ADVANCE NOTICE TO THE CONSTRUCTION INDUSTRY

InterCity Trainset Facilities Program

Project Name: InterCity Trainset (ICT) Facilities Program
Project Delivery Method: TBD
Solicitation Type: TBD
Projected Available Date of Solicitation: See below

Amtrak will be designing and constructing new facilities to support the new trainsets at various locations throughout its regional system to accommodate Amtrak's current and future fleet needs.

To accommodate these new trainsets, the types of facilities for this Program will consist of the following:

- **Heavy Maintenance Facilities (HMF)**

These facilities will be utilized for bad order repairs and to address the operations of routine maintenance and inspection. The HMFs will be enclosed facilities capable of overhauls and major extended repairs that are outfitted with larger equipment.

- **Maintenance and Inspection (M&I)**

These facilities will be enclosed buildings with diesel fueling capabilities utilized to perform routine maintenance and inspections.

- **Service and Cleaning (S&C)**

These facilities will be either exterior or interior facilities with the capabilities of routine maintenance and visual inspections. The service and cleaning tracks will be constructed with covered high-level platform (full or partial), foundations systems and service utility access.

Amtrak is initiating several procurements to select contractors for the ICT facilities listed below. The delivery method for each procurement will be determined by Amtrak and released once that information is available.

- **Seattle, Washington Facilities:** Amtrak is designing and constructing an M&I facility as well as S&C tracks.
- **Boston, MA Southampton Street Yard Facilities:** Amtrak is designing and constructing an M&I facility, Renovating the existing Regional Facility into an enclosed S&C facility & Renovating the existing HSR (high-speed-rail) Facility to accomdate ICT equipment, and modifying existing storage tracks.
- **Queens, NY Sunnyside Yard Facilities:** Amtrak is designing and constructing an M&I facility, S&C tracks, and Welfare Facilities.
- **Ivy City, Washington Facilities:** Amtrak is designing and constructing an M&I facility, Renovating the existing Regional Facility, and , S&C tracks.

Location

Seattle WA – SEA	August 2023
New M&I Facility Improvements	
New S&C tracks	

Boston - Southampton Street Yard	TBD
New M&I Facility	
Regional Facility Renovations & HSR (high-speed-rail) Facility Renovations	
NewS&C tracks & Storage Tracks	

New York - Sunnyside Yard	TBD
New M&I Facility	
New HSR Facility Renovations	
NewS&C tracks	

Washington Ivy City	TBD
Regional Facility Renovations	
HSR Facility Renovations	
NewS&C tracks	

Each location will be issued as a separate procurement package, with a two-step best value procurement anticipated for each procurement. The first step in each procurement will be the Request for Qualifications (RFQ) to invite interested firms to submit their qualifications and firms shortlisted in the first step will be eligible to participate in the Request for Proposals (RFP) stage for that procurement. All RFQ packages will be released via Amtrak's Procurement Portal (<https://procurement.amtrak.com>).
