# Who We Are

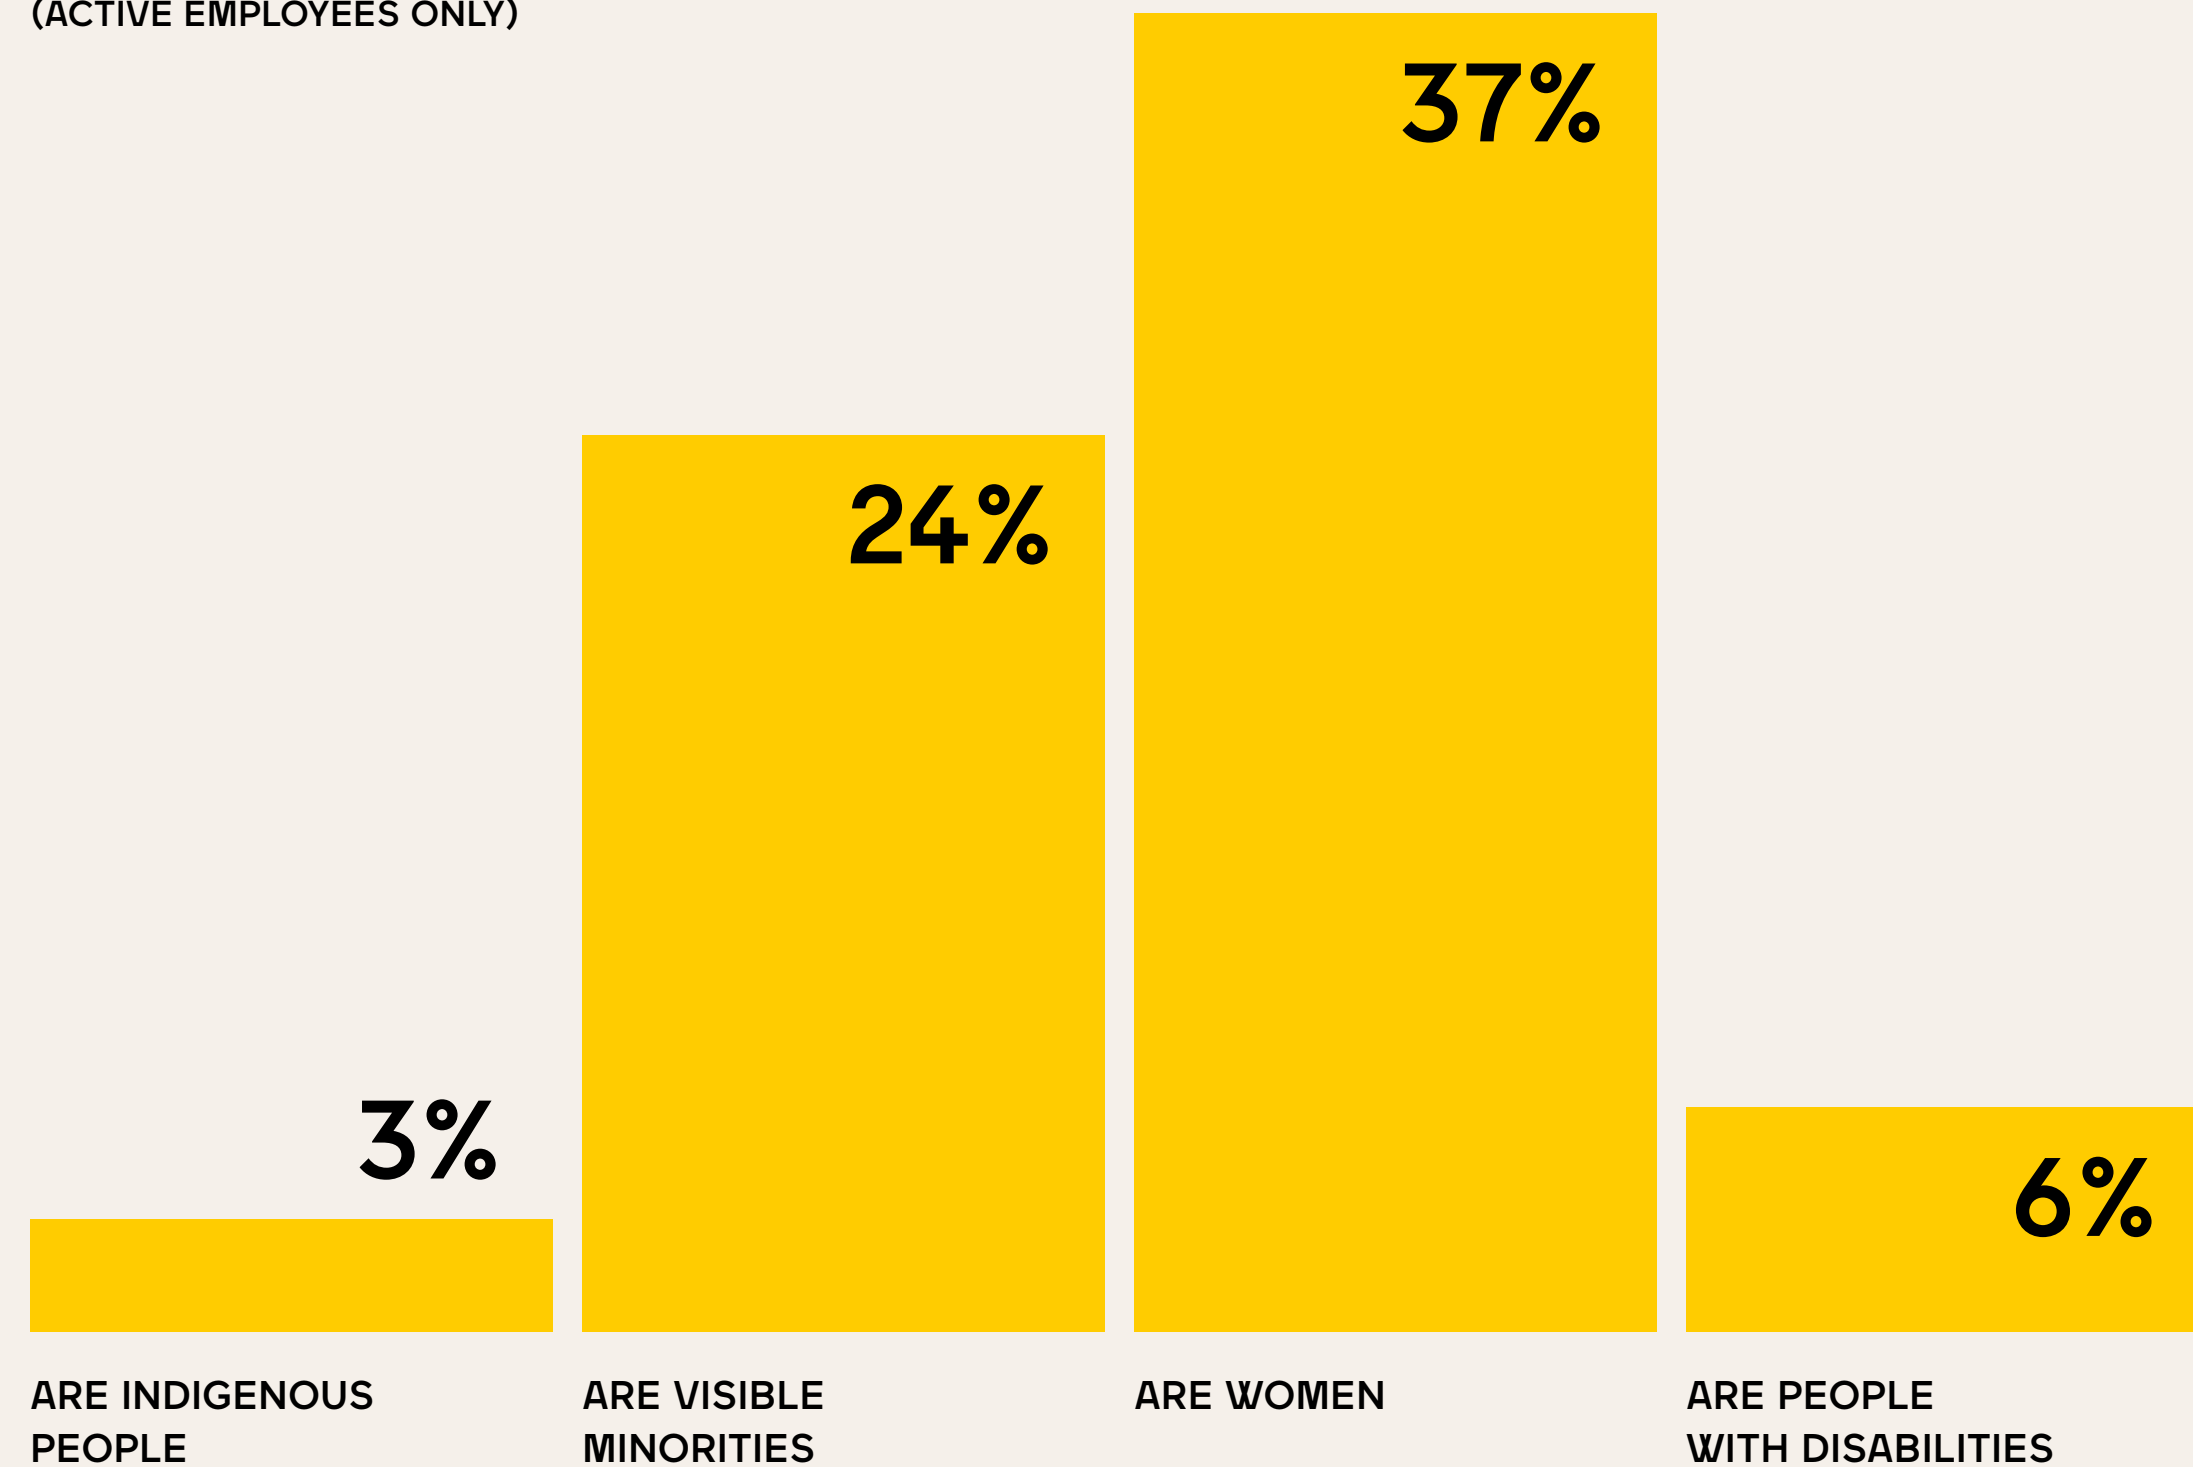

VIA Rail operates Canada's national passenger rail service on behalf of the Government of Canada, meeting passenger needs for intercity travel as well as transportation to regional and remote communities. An independent Crown corporation established in 1977, VIA Rail provides safe, accessible, reliable, cost-effective, and environmentally responsible service from coast to coast to coast in both official languages.

# Our On-Time Performance

**In 2024 VIA Rail faced exceptional operational challenges in the Québec City – Windsor Corridor which significantly affected our on-time performance. New infrastructure regulations imposed on VIA Rail impacted our ability to deliver the level of service our passengers deserve. We are actively addressing these issues to enhance the travel experience of our passengers.**

Evolution of VIA Rail’s OTP in the Corridor during the last two quarters of 2024

# Where We Operate

With a fleet of locomotives and train cars, stations and maintenance centres, VIA Rail’s operations span the nation we serve. Our employees are dedicated to moving Canadians from East to West, North to South, with stops in between.

Frequency Train Departures

419

departures per week on average

400+

communities served across Canada

### Long-Distance Travel and Tourism

In Western and Eastern Canada, VIA Rail's trains provide intercity service connecting communities while supporting Canada's tourism industry by attracting travellers from around the world. The *Canadian*, VIA Rail's western transcontinental train, provides service between Vancouver and Toronto. In Eastern Canada, the *Ocean* runs between Montréal and Halifax.

### Intercity Travel (in the Corridor)

In the densely populated Corridor area between Québec City and Windsor, VIA Rail trains provide travel between the downtown cores of major urban centres, as well as between suburban centres and communities.

### Regional Services

VIA Rail provides passenger service in several rural and remote regions of Canada. Mandated by the Government of Canada to meet essential transportation needs, these trains serve many communities where alternative, year-round transportation is limited or unavailable.

# VIAAction 2030: Our Strategic Plan

In 2024, VIA Rail introduced its new strategic plan, VIAAction 2030, which is the blueprint for the company's next chapter. This ambitious plan positions VIA Rail to become a best-in-class operator in North America and a leader in integrated mobility at the heart of the passenger journey.

## Our Strategic Pillars

### Customers and Communities:

Connecting more communities, moving more Canadians

### Safety and Security:

Safety and security is priority one, in everything we do, for our employees and our customers

### People and Culture:

A high-performing workplace where our people can bring their whole selves to work, are empowered for impact and thrive

### Environnement:

An environmental champion in our services and the way we operate

### Organizational Sustainability:

An organization that is agile, innovative and delivers financial rigour to drive performance

More information on VIA Rail's strategic plan can be found at [corpo.viarail.ca](https://corpo.viarail.ca)

# Our Vision, Our Mission and Our Values

VIA Rail is dedicated to ensuring that its vision, mission and values truly reflect its aspirations and the mandate provided by the Government of Canada.

## Our Vision

### A Smarter Way to Move People

We aspire to positively impact the lives of those around us: passengers, employees, partners and the communities we move. VIA Rail provides sustainable, efficient and effective passenger rail service while embedding environmental, social, economic and ethical considerations into our strategy and everyday operations.

## Our Mission

### Passengers First

Our primary focus is our passengers. We work on improving our services and redefining VIA Rail to provide our passengers with the most enjoyable travel experience and to find better ways to connect Canadian communities. Safety is and will remain paramount.

## Our Values

### Go Further Together

We collaborate to yield better results. We deliver as one. We are accountable for our actions to gain and maintain the trust of our shareholder, our customers, and our colleagues.

### Act Today for a Better Tomorrow

We understand that our actions today will affect the world we live in tomorrow. We embed sustainability as an important criterion in our decisions. We rethink our ways, and we challenge the status quo. We reimagine the possible.

### Go the Extra Mile

We put the customer at the centre of our decision-making. We put ourselves in the shoes of our passengers and our colleagues. We create positive experiences for both our customers and our colleagues, so they stay onboard.

# Message from the Chairperson of the Board of Directors

VIA Rail navigated 2024 with ambition and confidence, looking toward the future, while also addressing daily challenges that exposed certain vulnerabilities.

FRANÇOISE BERTRAND, o.c., c.q.  
Chairperson of the Board of Directors

Our promising future is expressed in a new strategic vision focused on transforming our organization to better serve Canadians from coast to coast. This vision aligns with our ongoing modernization efforts, exemplified by the launch of our new reservation system and the gradual integration of the new fleet in the Corridor. The Board is grateful to the government for sharing our commitment to a promising future for passenger rail in Canada. In support of this vision, the government has allocated a significant budget to enable VIA Rail to renew its more than 70-year-old pan-Canadian fleet in the coming years.

This next step of our fleet renewal—the replacement of our Long-Distance, Regional and Remote (LDRR) fleet—was approved in 2024. This investment is essential not only to improving the service we offer but also to preserving these iconic Canadian journeys and the essential services that VIA Rail has long provided. We help connect Canadians from coast to coast to coast, including many indigenous communities. With the renewal of our fleet, Canadians will continue to benefit from a modern, accessible, and sustainable passenger rail service.

At the core of our vision, embraced by the management team, the Board, and all employees, is our unwavering commitment to ensuring the safety, comfort, and overall experience of our passengers. Achieving this goal requires a relentless focus on efficiency and effectiveness, which are vital to our financial sustainability. These principles not only strengthen confidence in our organization but also reinforce the trust of the government, our customers, and our partner, Transport Canada.

The challenges we face are numerous, and the Board of Directors takes its fiduciary role seriously, working diligently to support VIA Rail’s management and employees. Our priority remains our passengers, and we are committed to finding the necessary solutions to overcome obstacles. It is crucial to recognize that 97% of our operations take place on tracks owned by freight railways, which have priority over passenger trains. As a result, our reliance on rail owners (particularly CN Rail) poses a significant challenge. While negotiations with them are essential, we must also depend on the understanding and intervention of Transport Canada. We need the support of infrastructure owners if we are to meet the expectations of Canadians.

As I prepare to step down after 8 years as Chairperson of the Board, I reflect on these years with pride, knowing that together we have achieved significant milestones in connecting Canadians. I recognize that VIA Rail still faces many challenges, but I am confident that the commitment of the Board members, the expertise of the management team, and the dedication of all employees will allow VIA Rail to meet them. So many times, I've heard glowing comments about the service our employees provide over the phone, on board our trains and in our stations. I would like to express my gratitude to all of you, despite delays and difficulties, it is you who ensure that our passengers continue to enjoy their journey.

I would like to thank the four Ministers who have been supportive over the past eight years. The Honourable Marc Garneau, the Honourable Omar Alghabra, the Honourable Pablo Rodriguez, the Honourable Anita Anand and finally, the current Minister, the Honourable Chrystia Freeland. Without their support, VIA Rail would not have been able to reach the milestones we have achieved. They believe in the future of passenger rail, and thanks to them, several key developments have taken place, including the acquisition of the new Corridor fleet and the authorization to begin the process of replacing our long-distance fleet.

I recognize that this support is also the result of a collaborative and partnership-based relationship with Transport Canada, and I am grateful to all those we have worked with closely over the years.

I would like to express my sincere gratitude to all the members of the Board with whom I have had the privilege of working over the years. Their integrity, dedication, and strong sense of responsibility have been instrumental in supporting our management and upholding our fiduciary duties. Beyond providing oversight, they have played a vital role in shaping our strategic vision. This year, we welcomed three new members: Jonathan Scott from Bradford, Catherine Kloepfer from Winnipeg, and Filipe Dinis from Ottawa. I am certain that their expertise and experience will contribute significantly to VIA Rail's progress and help to drive the Corporation forward.

Looking ahead, I am confident that the building blocks are in place to usher in a new era in passenger rail. I firmly believe that VIA Rail remains the smarter way to move and is a key component of our transportation network, especially as we tackle the challenges of climate change.

It was an honour and a privilege to serve as the Chairperson of VIA Rail. Thank you for your confidence. Let's continue the journey!

**FRANÇOISE BERTRAND, o.c., c.q.**  
**Chairperson of the Board of Directors**

# Message from the President and Chief Executive Officer

**2024 was a transformative year for VIA Rail—one that laid the foundation for an exciting future. Around the world, train travel is experiencing a renaissance, and Canada’s national rail carrier is poised to seize this moment. With progress in upgrading our equipment, and setting our strategic plan in motion, we are charting a new course that will redefine the passenger experience for generations.**

**MARIO PÉLOQUIN**  
President and Chief Executive Officer

At the heart of this transformation is VIAAction 2030, the strategic roadmap we unveiled at the start of the year. This five-year plan is built on five pillars: our passengers, our employees, safety, sustainability, and financial responsibility. More than just a vision, VIAAction 2030 is a results-driven strategy that calls for continuous improvement. Every quarter, our team updates the Board on tangible actions that drive us closer to becoming a best-in-class operator and leader in integrated mobility, putting us at the heart of the passenger journey.

2024 was a year of meaningful progress. The full integration of our new reservation system marked a major milestone, making booking and managing travel more intuitive and seamless. The launch of our mobile app provided passengers with a more convenient way to plan and enjoy their journeys. These innovations reflect our customer-centric approach, placing ease and accessibility at the forefront.

Another landmark achievement was securing funding for the replacement of our long-distance, regional, and remote (LDRR) fleet—trains that connect communities across Canada. Given the age of our equipment, this investment ensures that VIA Rail continues to serve Canadians in every region. By the end of the year, we launched a Request for Qualifications process to engage providers for 320 new cars and 42 locomotives, marking the beginning of the largest fleet renewal in our history.

Our transformation also extended to the rollout of our new fleet in the Québec City-Windsor corridor, with a new train set arriving each month. One of the highlights of the year was the official launch of these trains in Southwestern Ontario. In London and Windsor, surrounded by enthusiastic residents and local leaders, we celebrated a new era of rail travel—one that is defined by comfort, efficiency, and sustainability.

Of course, 2024 was not without its challenges. In October, our operations in the corridor were presented with new and exceptional operational challenges imposed by CN Rail, which had a significant impact on our on-time performance. We are actively addressing these issues, taking proactive steps through all proper authorities, and engaging in ongoing discussions with host railways to deliver a better experience for our passengers. We remain committed to delivering a reliable, seamless service, and we are hopeful that we will find a resolution to these issues soon.

Despite these challenges, Canadians continue to embrace train travel, with ridership approaching record highs. At the same time, our financial performance remained strong, with a greater-than-expected reduction in our operating deficit. This success reflects our disciplined approach to financial stewardship and our ability to deliver more for passengers while maintaining fiscal responsibility.

VIA Rail's progress has not gone unnoticed. We were honoured to be recognized as one of Canada's Best Employers by Forbes and received top rankings in Leger's Canadian Reputation Study, where we were named Most Trusted Carrier and ranked first as an Employer of Choice. In addition, Condé Nast Traveler once again listed *The Canadian* among the Best Train Trips in the World. These accolades reaffirm what we have always known: train travel inspires trust and loyalty among our customers.

This year, I had the privilege of travelling across Canada, sharing VIA Rail's vision and engaging with communities about our future. Among my most memorable journeys was a trip aboard *The Canadian*, travelling from Toronto to Vancouver. Over four days, I spoke with Canadians and travellers from around the world who had come to Canada specifically for this experience. As breathtaking landscapes passed by, I was reminded of the magic of long-distance travel—the way it brings people together, sparks conversations, and creates lasting memories. I was also reminded of the remarkable dedication of our onboard teams, who consistently go the extra mile to ensure every passenger feels welcomed and valued.

With that in mind, I want to express my thanks to our extraordinary team. Our success in 2024—and every year—would not be possible without the dedication of the 3,711 people who make VIA Rail what it is. Their commitment to exceptional service and our mission to connect Canadians is at the heart of everything we do.

As we continue our journey guided by VIAAction 2030, I am confident that VIA Rail will not only navigate today's challenges but emerge stronger, more efficient, and better positioned to serve Canadians for generations to come. With each new milestone, we are shaping a future where train travel is more accessible, sustainable, and central to our country's transportation network.

Thank you for your continued support. Together, we are building a VIA Rail that is ready to meet the needs of today while embracing the possibilities of tomorrow.

**MARIO PÉLOQUIN**  
President and Chief Executive Officer

# Message from our Chief Financial and Technology Officer

I am honoured to have joined VIA Rail as Chief Financial and Technology Officer in February of 2024. I am proud to be part of a dedicated group of people committed to serving Canadians, people who work collaboratively and with great skill to support our mission. From the engineers and on-board crews to the maintenance workers and station staff and from top to bottom at head office, everyone is passionate about the importance of what we do and the need to do it well.

CARL DELISLE, CPA  
Chief Financial and Technology Officer

As a result of their collective efforts and talents, I am proud to report that the VIA Rail team delivered a strong performance over the course of the year, overcoming challenges such as devastating wildfires, a slowing economy, and unprecedented operational impediments.

We saw improvements in every important measurement. Revenues were up, reaching \$478M, while VIA Rail decreased its forecasted funded deficit by \$9M, which exceeded projections and has the Corporation ahead of schedule as we work towards our goal to generate savings of 15% on our operating deficit. A laser focus on financial rigour played a key role in these positive results. VIA Rail enacted a continuous improvement program, finding financial efficiencies and avoiding costs, all while maintaining service levels.

Ridership continued to grow, as we served 4.4M passengers in 2024, building upon our post-pandemic comeback. The delivery of our new mobile app, in conjunction with the new reservation system, enabled us to better serve our customers. I am proud to say that the app was developed internally at VIA Rail, and its success is a ringing endorsement of the skill of our employees.

The launch of our new strategic plan, VIAAction 2030, was a crucial moment, giving us a clear vision of where we want to go as a corporation. It is helping the entire team understand our goals and how to achieve them. In 2024, we made important progress on delivering tangible results – enhancing our services, advancing the renewal of our fleet, improving the customer experience, and strengthening our financial sustainability – while staying committed to our long-term vision of a more accessible, efficient, and sustainable passenger rail network to serve all Canadians.

Our bosses are the people of Canada. We are handling their money to deliver an essential service for them. All of us at VIA Rail are keenly aware that we are accountable to our employers – the taxpayers of Canada. It is a huge responsibility that we take seriously, and we are collectively committed to working hard every day to earn and maintain their trust.

As we move forward, I'm inspired by the opportunity to help shape a financially strong, customer-focused, and future-ready VIA Rail – one that delivers on its mandate and on the trust that Canadians place in us. Together, we are building a more efficient, sustainable, and accessible railway – one that not only meets the needs of today but continues to serve Canadians for generations to come.

**CARL DELISLE, CPA**

# Governance

## The Board of Directors

**VIA Rail’s Board of Directors, in collaboration with the Executive Management team, plays a critical role in aligning the Corporation’s strategic direction and Corporate Plan with the objectives of the Government of Canada. Board members report to VIA Rail’s sole shareholder, the Government of Canada, through the Minister of Transport.**

As of December 31, 2024, the Board of Directors consisted of the Chairperson of the Board, the Chief Executive Officer and 10 other directors appointed by the Government of Canada. Of the eleven directors (not including the Chief Executive Officer of VIA Rail), four are women and seven are men. The Board is responsible for overseeing the strategic direction and management of the Corporation, and reports on VIA Rail’s operations to Parliament through the Honourable Anita Anand, Minister of Transport.

The Board held 22 meetings, and the committees met a total of 24 times over the course of 2024. The average overall attendance rate of Board meetings was 92%. Cumulative fees paid to board members during this time period totalled \$439,000.

**JONATHAN SCOTT**

BRADFORD (ONTARIO)

**Board member since July 2024**

Member of the Stakeholders' Engagement and Communications Committee and member of the Human Resources Committee

## Directors' Experience

The Board of VIA Rail is composed of experienced and diverse experts in various fields such as corporate governance, government affairs, finance, project management, human resources, public policy, as well as risk management, safety and security. Board members use their combined wealth of experience to guide and shape the strategic path of VIA Rail.

## Independence of the Board

The Board, except for the President and Chief Executive Officer, maintains its independence from the Corporation's management. This separation ensures a productive relationship, with the Board holding management accountable for VIA Rail's performance and routinely evaluating how responsibilities are allocated within the organization. The governance of Board activities and the delineation of the Board's exclusive powers are outlined in the VIA Rail bylaws. The Board and Committee Charters further clarify the Board's governance roles and responsibilities and offer detailed guidelines on Board procedures.

Board and Committee meetings are structured to include designated in camera sessions. In these sessions, directors can have confidential discussions with the Chief Executive Officer, as well as separate meetings in the Chief Executive Officer's absence. The Audit and Pension Investment Committee engage in private meetings in three distinct formats: with the Office of the Auditor General of Canada's representatives; with VIA Rail's Chief Financial and Technology Officer, as well as with the Internal Auditor; and exclusively as a Committee without the Chief Executive Officer.

## Supporting VIA Rail's Modernization

In 2024, VIA Rail's Board of Directors continued its essential role in guiding and overseeing the Corporation's strategic approach and identification of opportunities, especially in a year marked by important milestones, including the commercial launch of the new Corridor fleet, the onboarding of three new Board members, as well as the governance oversight of new programs and initiatives.

## Strategy

In 2024, the VIA Rail Board and the Executive Management team launched VIAAction 2030, the new vision and strategy of VIA Rail, which includes transformation initiatives, and a forward-looking strategic perspective. This strategy helped shape VIA Rail's Corporate Plan, ensuring it is in sync with the priorities of its shareholder.

## Launch of the Special Examination

In 2024, the Auditor General of Canada (OAG) conducted its regular Special Examination of VIA Rail, a process that occurs every 10 years, underscoring the corporation's commitment to transparency, accountability, and continuous improvement. This rigorous, independent review will provide in 2025 invaluable insights into VIA Rail's operations, helping to ensure that public funds are being used efficiently and effectively. By embracing this examination, VIA Rail demonstrates its dedication to upholding the highest standards of governance and integrity, reinforcing its role as a responsible steward of taxpayer resources and a leader in the Canadian transportation sector.

## Composition and Committees

The renewal of the Board has been a key focus. In 2024, three new board members were appointed by the government to fill vacancies. The Privy Council Office also continued its selection processes to fill one vacant director position and to find a new Chairperson of the Board of Directors.

## Compensation

Director compensation at VIA Rail is determined by Order in Council. Both the Chairperson and other independent directors are compensated with an annual retainer for their service and participation in Committee and Board meetings. They also receive a fixed per diem for travel time. The compensation structure, which aligns with the Treasury Board Guidelines, is as follows:

- Chair of the Board: Receives an annual retainer of \$12,400 and a per diem of \$485.
- Directors: Receive an annual retainer of \$6,200 and a per diem of \$485.
- Chairs of Committees: Receive the base retainer plus an additional annual retainer of \$6,200.

Directors are also reimbursed for reasonable out-of-pocket expenses incurred while performing their duties. These expenses include travel, accommodation, and meals. It's noteworthy that each Board member serves on multiple committees.

## Committees of the Board

As of December 31, 2024, the Board and Committee structure was composed of the following committees:

- **Audit and Pension Investment Committee:**  
Gail Louise Stephens (Chair), Filipe Dinis, Catherine Kloepfer, and Kenneth Tan
- **Major Projects and Fleet Modernization Committee:**  
Glenn Rainbird (Chair), Filipe Dinis, Miranda Keating Erickson, Catherine Kloepfer and Kenneth Tan
- **Human Resources Committee:**  
Miranda Keating Erickson (Chair), Grant Christoff, Jonathan Goldbloom, Jonathan Scott, and Gail Louise Stephens
- **Stakeholders' Engagement and Communications Committee:**  
Jonathan Goldbloom (Chair), Grant Christoff, Daniel F. Gallivan and Jonathan Scott
- **Governance Committee:**  
Daniel F. Gallivan (Chair), Miranda Keating Erickson, Jonathan Goldbloom, Gail Louise Stephens, and Glenn Rainbird

The Committees' mandates are available under the "Board of Directors" section of VIA Rail's [corpo.viarail.ca](https://corpo.viarail.ca) website. The Chairperson of the Board of Directors is an ex officio member of all Committees. The President and Chief Executive Officer is also an ex officio member of all Committees, except the Audit and Pension Investment Committee.

## Board and Management Training

In alignment with their commitment to proactive governance and staying ahead of emerging issues, both the Board and management at VIA Rail have participated in 2024 in specialized training sessions on a range of key areas. These include artificial intelligence (AI), accessibility, the regional footprint of rail passenger services, the economic impact of VIA Rail in its regions, and ethics and compliance in major projects.

Recognizing the transformative potential of AI, both the Board and management have received training to understand its applications and implications, ensuring they remain informed about cutting-edge technology and its strategic impact. In addition, VIA Rail has prioritized accessibility in its operations, ensuring both the physical infrastructure and digital platforms meet the highest standards of inclusivity. This focus on accessibility underscores VIA Rail's commitment to serving all passengers and communities. The Board and management also engaged in a deep dive into VIA Rail's regional economic footprint, emphasizing the corporation's role in driving regional economic development. This training provided insights into how VIA Rail's operations contribute to local economies and the broader national economy, helping inform decisions that align with regional growth strategies. Moreover, VIA Rail has placed a strong emphasis on ethics and compliance, especially in relation to major projects. Through focused training on ethics, governance, and compliance, the Board and management have reinforced their commitment to upholding the highest standards of integrity in all project phases—from planning to execution.

These training efforts reflect VIA Rail's dedication to responsive governance and its proactive approach to navigating the challenges and opportunities in both the corporate and societal landscapes.

## Travel, Hospitality and Conference Expenses

### THE FOLLOWING TRAVEL, HOSPITALITY AND CONFERENCE EXPENSES WERE SUBMITTED DURING 2024

| Financial Planning Services     |          |          |

1. On December 31, 2024, Executives Officers were: President and Chief Executive Officer, Chief Communications and Human Resources Officer, Chief Financial and Technology Officer, Chief Strategy Officer, Chief Commercial Officer, Chief Service Delivery Officer and General Counsel.

2. The cash compensation does not report the actual salary and incentives paid to executives but merely the range for their respective positions.

## Annual Public Meeting

VIA Rail's 2024 Annual Public Meeting was pre-recorded and presented on August 7, 2024. During the meeting, Françoise Bertrand, Chairperson of the Board of Directors, Mario Péloquin, President and Chief Executive Officer and Carl Delisle, Chief Financial and Technology Officer, shared and discussed results from 2023 along with VIA Rail's plans for the future. Canadians were invited to submit questions about our operations and services in the weeks leading up to the meeting, which can be found [here](#). Subtitled versions of the Annual Public Meeting are available on [VIA Rail's YouTube channel](#) in both official languages and offered with closed captioning, voiceover, and sign language interpretation (ASL).

## Access to Information and Privacy

VIA Rail believes that openness and transparency are the starting points in building a relationship of trust with its customers, partners and the public in general. VIA Rail has continuously improved its practices related to access to information as provided in the *Access to Information Act* and the *Privacy Act*, to which VIA Rail became subject in 2007.

In the summer of 2024, as per the requirements of the Government of Canada, VIA Rail submitted its 2023–2024 annual reports on access to information and privacy to the Access to Information Commissioner and the Privacy Commissioner, respectively, as well as to the Minister of Transport. VIA Rail is committed to responding to information requests from the public, the media and all those interested in our operations in a timely manner. From April 1, 2023, to March 31, 2024, VIA Rail received 75 new requests under the *Access to Information Act* and the *Privacy Act*. This compared to a total of 62 requests received during the corresponding period from April 2022 to March 2023.

# Management's Discussion and Analysis

For the quarter and the year ended  
December 31, 2024

## 1. Introduction

Management's discussion and analysis report outlines the financial results of VIA Rail Canada Inc. (The Corporation) for the quarter and the year ended December 31, 2024, compared with the quarter and the year ended December 31, 2023. This document should be read in conjunction with the audited financial statements and notes.

### Materiality

In assessing what information is to be provided in this report, management applies the materiality principle as guidance for disclosure. Management considers information material if it is probable that its omission or misstatement, judged in the surrounding circumstances, would influence decisions that the Corporation's stakeholders make on the basis of the financial information.

### Forward-Looking Statement Disclosure

This Management's discussion and analysis report contains forward-looking statements which may be identified with the words "may", "likely to", "could". These statements reflect our evaluation of the information currently available and are subject to a number of risks and uncertainties referred to in the risk section of this document.

## 2. Corporate Overview

VIA Rail is a non-agent Crown Corporation which operates Canada's national passenger rail service on behalf of the Government of Canada. The Corporation's objectives are to manage and provide a safe, efficient, reliable, and environmentally sustainable passenger rail service that meets the needs of travellers in Canada.

The Government of Canada determines the Corporation's role within the overall structure and services provided by the Federal government and provides appropriations to subsidize passenger rail services.

(Amounts in brackets represent decreases)

Note 1: Comparative figures as at December 31, 2023

Note 2: Based on funded results

### 3. Highlights of Financial Results and Major Key Operating Statistics (cont'd)

#### Financial Highlights

##### Fourth quarter

- Total revenues increased by 13.1 percent resulting from an increase in ridership led by higher demand as well as by an increase in average revenues, compared to the corresponding quarter of 2023.
- Operating expenses increased by 1.9 percent mainly due to the higher compensation costs, additional train operation costs associated with speed limitation on the Corridor and increase in depreciation and amortization.
- The operating loss decreased by 6.5 percent due to an increase in revenues higher than the increase in operating expenses.
- Operating funding increased by 7.4 percent, reflecting the increased amounts required for funded activities.
- The Corporation generated a comprehensive income of \$28.7 million compared to a comprehensive loss of \$45.3 million in 2023. The variation is mainly due to the remeasurements of the defined benefit components of the pension plans and other employee benefit plans which is higher than the corresponding quarter of 2023.

### 3. Highlights of Financial Results and Major Key Operating Statistics (cont'd)

#### Year

- Total revenues increased by 10.7 percent driven by higher demand and increased frequencies, as well as a rise in average revenues.
- Operating expenses increased by 7.4 percent due to the higher costs directly associated to the additional frequencies operated compared to the corresponding period of 2023 and to higher depreciation on fixed assets due to the commissioning of several tangible assets and the introduction of additional train sets of the new fleet.
- The operating loss increased by 4.7 percent due to an increase in operating expenses, partly offset by an increase in revenues.
- Operating funding increased by 0.9 percent, reflecting a slight increase in the amounts required for funded activities.
- The Corporation generated a comprehensive income of \$106.6 million compared to a comprehensive loss of \$40.8 million in 2023. The variation is mainly due to the remeasurements of the defined benefit components of the pension plans and other employee benefit plans and partly offset by an increase of the amortization of deferred capital funding.

Revenues per available seat-mile (RASM) have declined, as the 13.1 percent increase in revenues did not keep pace with the 16.8 percent increase in capacity (seat-miles). Costs per available seat-mile (CASM) have decreased. As 1.9 percent rise in costs was lower than the 16.8 percent increase in capacity (seat-miles). The cost recovery ratio improved by 1.6 percent compared to the same quarter last year and by 2.5 percent on a cumulative basis.

## 4. Analysis of Financial Results (cont'd)

### 4.1 Comparison of IFRS and Funded Operating Results (cont'd)

#### Net income (loss) under IFRS for the quarter:

Net income of \$0.5 million this quarter, compared to a net loss of \$13.7 million last year, representing an improvement of \$14.2 million mainly due to:

- Lower operating loss of \$9.8 million driven by an increase in revenues of \$14.7 million and higher operating expenses of \$4.9 million.
- Higher government operating funding recognized during the quarter of \$6.9 million.

#### Net income (loss) under IFRS for the year:

Net income of \$0.1 million for the year, compared to a net loss of \$9.1 million last year, representing an improvement of \$9.2 million mainly due to:

- Higher revenues of \$46.1 million partly offset by higher operating loss of \$23.9 million (attributable to higher expenses of \$70.0 million associated to the additional capacity deployed).
- Slightly higher government funding recognized during the year of \$3.4 million, higher amortization of deferred capital funding of \$26.3 million and higher deferred income tax recovery of \$3.4 million.

#### Comprehensive income

Comprehensive income includes the remeasurement of the defined benefit component of the pension plans and other employee benefit plans is composed of quarterly non-cash remeasurements resulting from changes in actuarial assumptions and the return on pension plan assets. For more details see Note 16 of the audited financial statements.

## 4. Analysis of Financial Results (cont'd)

### 4.2 Revenues (cont'd)

#### Passenger revenues

Passenger revenues have increased by \$13.9 million (13.1 percent) this quarter and by \$43.2 million (10.5 percent) for the year, reflecting the reintroduction of services and a capacity increase. The quarterly increase is due to higher ridership (4.3 percent) and improved average revenues (9.2 percent). Annually, the growth is driven by a 6.6 percent increase in ridership and a 4.3 percent increase in average revenues.

#### Québec City–Windsor corridor

Revenues have increased by \$13.5 million (15.2 percent) during the quarter as a result of higher ridership (4.1 percent) as well as improved average revenues (8.7 percent). Capacity deployed has also increased by 13.8 percent compared to the corresponding quarter last year. On a cumulative basis, revenues have increased by \$46.0 million (14.1 percent) for the year mostly due to higher ridership (6.5 percent) combined with improved average revenues (4.1 percent). Capacity deployed was 12.3 percent higher than last year.

The increase in average revenues during the quarter and the year ended December 31, 2024 reflects the introduction of a fare differentiation pricing approach which is one of the new features of the new reservation system launched by the Corporation in November 2023. The fare differentiation approach allows customers to benefit from different fare options with distinctive features and benefits, enhancing value propositions.

#### Ocean

Revenues for the quarter remained stable compared to last year. Ridership has increased by 0.6 percent for the quarter while capacity deployed decreased by 2.6 percent. On a cumulative basis, revenues have increased by \$1.3 million (10.2 percent). The increase is attributable to improved average revenues (1.7 percent) and higher ridership (6.8 percent). Capacity deployed increased by 15.9 percent.

#### Canadian

Revenues have increased by \$2.4 million (20.7 percent) compared to the same quarter last year. The increase results from higher ridership (11.8 percent) as well as higher average revenues (9.9 percent). On a cumulative basis, revenues have increased by \$8.0 million (14.5 percent). The increase is attributable to higher average revenues (8.5 percent) as well as improved in ridership (3.9 percent). Capacity deployed increased by 13.7 percent for the quarter and by 6.4 percent for the year.

## 4. Analysis of Financial Results (cont'd)

### 4.2 Revenues (cont'd)

#### Regional services

Revenues have increased by \$0.5 million (55.6 percent) for the quarter. The increase results from higher ridership (9.6 percent) offset by lower average revenues (5.2 percent). On a cumulative basis, revenues have increased by \$1.3 million (34.2 percent) due in most part to the increase in ridership (16.3 percent) and the increase in average revenues (4.0 percent).

#### Other revenues

Other revenues have increased by \$0.8 million (13.1 percent) for the quarter and have increased by \$2.9 million (13.0 percent) for the year. These increases are due to higher investment income driven by the high interest rates, as well as to higher third-party and station revenues, reflecting the increased levels of operations.

(Explanations are provided for expenses for which quarterly variances are of \$3 million or more, or 10 percent or more)

## 4. Analysis of Financial Results (cont'd)

### 4.3 Operating Expenses (cont'd)

Total operating expenses increased by \$4.9 million (1.9 percent) for the quarter and by \$70.0 million (7.4 percent) for the year. The primary variances are:

#### Compensation and employee benefits

The expenses increased by \$6.0 million (6.1 percent) during the quarter and by \$26.4 million (7.2 percent) for the year. The increases for both the quarter and the year are mainly due to higher staffing costs associated with the additional frequencies operated compared to the corresponding quarter in 2023 as well as the impact of annual salary increases.

#### Train operations and fuel

The expenses increased by \$3.6 million (7.9 percent) during the quarter and by \$13.1 million (7.2 percent) for the year. The increases for both the quarter and the year are resulting from higher costs for access to third-party infrastructure, fuel expenses, track maintenance and higher crew expenses reflecting the additional capacity deployed as well as from annual contractual cost increases.

#### Stations and property

The expenses decreased by \$0.1 million (0.7 percent) during the quarter and increased by \$3.1 million (6.5 percent) for the year. The increase for the year is due to higher lease costs, as well as additional building and site maintenance expenses reflecting the increased level of frequencies and ridership.

#### Marketing and sales

The expenses decreased by \$3.6 million (26.5 percent) during the quarter and by \$8.3 million (19.6 percent) for the year. The decreases for both the quarter and the year are mainly attributable to the lower data processing costs associated to the new reservation system (as last year, during the implementation of the new reservation system, costs were paid for both the old and new systems) partly offset by increases in promotion and advertising costs for the quarter and the year.

#### On-train product costs

The expenses increased by \$2.1 million (21.6 percent) for the quarter and by \$5.2 million (13.1 percent) for the year. The increases are primarily due to higher ridership particularly in Business and Sleeper classes, as well as higher prices reflecting current inflation rates.

## 4. Analysis of Financial Results (cont'd)

### 4.3 Operating Expenses (cont'd)

#### Professional services

The expenses increased by \$0.9 million (13.0 percent) during the quarter and decreased by \$10.5 million (36.2 percent) for the year. The decrease for the year reflects the fact that in 2023 additional consulting services were incurred as part of a corporate wide initiative to identify cost savings and revenue-generating opportunities.

#### Telecommunications

The expenses decreased by \$0.2 million (2.1 percent) during the quarter and increased by \$5.2 million (17.0 percent) for the year. The increase for the year is primarily due to support and license costs associated with newly implemented systems as well as higher telecommunications costs reflecting the increased level of services and Wi-Fi usage.

#### Loss on disposal of property, plant and equipment and intangible assets

The expenses decreased by \$8.0 million (95.2 percent) during the quarter and by \$5.8 million (53.7 percent) for the year. The decreases are due to the retirement and disposal in 2023 of more equipment at the end of life.

#### Unrealized (net gain) net loss on derivative financial instruments

Net gain of \$2.8 million for the quarter and net gain of \$2.4 million for the year compared to a net loss of \$3.5 million for the quarter and net loss of \$2.2 million for the year ended December 31, 2023. Net gain for the quarter and the year reflects the fact that contract prices are lower than market fuel prices.

#### Other expenses

The expenses increased by \$1.3 million (12.7 percent) for the quarter and by \$11.5 million (30.5 percent) for the year. The increases for both the quarter and the year result mainly from higher provision for costs resulting mainly from environmental cases.

## 4. Analysis of Financial Results (cont'd)

### 4.4 Financial Position (cont'd)

The main year-over-year changes in the Statement of Financial Position result from the following major elements:

#### Assets

Total assets have increased by \$550.9 million due mainly to:

- An increase in property, plant and equipment and intangible assets of \$439.9 million as the Corridor Fleet Replacement Project, maintenance centres projects and Information technology projects are progressing.
- An increase in employee benefit assets of \$131.5 million resulting from a return on plan assets and a decrease in the discount rate.

#### Liabilities and deferred capital funding

Total liabilities and deferred capital funding have increased by \$444.2 million mainly due to:

- An increase in deferred capital funding of \$380.8 million due to government funding invoiced of \$524.1 million for property, plant and equipment and intangible assets as well as an amount of \$3.0 million for an advance on contract, less amortization of \$141.6 million and loss on disposal of \$5.0 million.
- An increase in deferred income tax liabilities of \$33.8 million associated with an increase in employee benefits assets.
- An increase in non-current other payables of \$25.5 million mostly related to holdbacks on contracts.
- An increase of \$7.0 million in current liabilities due to an increase in deferred revenues and other liabilities of \$11.0 million partly offset by a decrease in trade and other payables of \$5.0 million.

#### Comprehensive income

Other comprehensive income increased mainly due to the return on plan assets and the discount rate affecting employee benefit assets and liabilities.

(Amounts in brackets represent decreases)

#### Operating activities

Net cash decreased by \$15.0 million as (76.5 percent) for the quarter and by \$29.8 million (451.5 percent) for the year. The variances are mainly due to the change in working capital items (\$28.8) million for the quarter and (\$39.4) million for the year as shown in Note 20 of the audited financial statements.

#### Investing activities

Net cash increased by \$89.1 million (1,747.1 percent) for the quarter and by \$57.5 million (547.6 percent) for the year. The increases for the quarter and for the year are mainly due to the timing of the amount received from the government compared to the amounts paid for the acquisition of property, plant and equipment and intangible assets.

## 4. Analysis of Financial Results (cont'd)

### 4.5 Liquidity, Cash Flows and Capital Investments (cont'd)

#### Funded capital investments

Property, plant and equipment and intangible assets totalled \$2,585.0 million as at December 31, 2024, which is an increase of \$439.9 million compared to the balance as at December 31, 2023.

Funded capital investments of \$524.1 million were made during the year.

(Amounts in brackets represent decreases)

The most significant investments made during the quarter and the year were in the Corridor Fleet Replacement Program, in the Maintenance centres program, in Equipment projects including the HEP (head-end power) long haul and non-Corridor equipment rebuild program (referred to as the "Heritage program") and in Infrastructure projects (for track and bridge improvements as well as for the infrastructure project to improve the fluidity and connectivity in Montréal for which the Corporation received funding of \$490.1 million).

## 5. Results compared to the 2024-2028 Corporate Plan<sup>(1)</sup>

**(1): The Corporate plan provides information on funded activities, therefore comparison between actual and planned results are based on funded activities.**

The Corporation continues to work towards achieving the goals and strategies identified in its corporate plan. The financial results of the quarter were in line with corporate plan assumptions and forecasts.

In terms of capital expenditures, investments for the quarter were higher than planned expenditures, work progresses on the major strategic projects identified in the plan such as the Corridor Fleet Replacement Program, the HEP equipment rebuild programs, and in the infrastructure projects.

## 5. Results compared to the 2024-2028 Corporate Plan<sup>(1)</sup> (cont'd)

### Parliamentary appropriations

The Corporation receives its funding from the Government of Canada based on the Government's fiscal year which begins April 1 and ends March 31. Thus, parliamentary appropriations for operating expenses and capital expenditures are based on the Government's fiscal year.

### Parliamentary appropriation for operating expenses

|  | For the twelve-month period ending<br>March 31, 2025 | For the twelve-month period ending<br>March 31, 2024 |

| Total appropriation recognized for the period                              | 426.7  | 318.4  |
| <b>Appropriation available for remainder of the government fiscal year</b> | <b>1,124.2</b>                                       | <b>746.5</b>   |

Note 1: For 2023-24 - includes an amount of \$131.7 million received for capital investments obtained through Supplementary Estimates B.

Note 2: For the period ending March 31, 2025, includes a reprofiling amount of 194.4 million from 2023-24 to 2024-25.

## 6. Risk Analysis

This section highlights the Corporation’s key risks which may have potential impact on the Corporation’s financial results and provides information on risks for which the trend or status has changed compared to the status as at December 31, 2023.

As at the December 31, 2024, the trend changed for the following risks:

| Nature of Risk  | Trend   | Current Situation   |
|---|---|---|
| <b>Financial Sustainability</b>   |   |   |
| <p>The Corporation has limited powers as a non-agent Crown Corporation and is dependent on annual government budgetary allocations to fund its operations, capital and pension obligations.</p> <p>Government funding constitutes a risk in the efficient delivery of the Corporation’s services, as well as in the planning and execution of its medium-to-long-term strategies.</p> |  | <p>The Corporation has been faced with increasing costs since 2023 due to the high inflation, particularly in compensation costs but also in fuel, maintenance materials, on-train product costs and third-party access costs. The Corporation received additional operational funding from the Government of Canada as part of the 2024 Federal Budget and will have sufficient funding for the years 2024 and 2025.</p> <p>The Corporation continues to closely monitor the situation and is in communication with Transport Canada concerning potential additional funding requirements for years beyond 2025.</p> |

Increasing

Stable

Decreasing

## 6. Risk Analysis (cont’d)

| Nature of Risk   | Trend   | Current Situation   |
|--|---|---|
| <b>Service Offering</b>  |   |   |
| <p>The Corporation’s lack of ability to meet travel market needs through existing and future services could hinder its capacity to meet the revenue plan and can cause the funding to be insufficient and lead to cost/service reductions.</p> <p>Current service offering challenges include:</p> <ul style="list-style-type: none"> <li>→ Deteriorating economic environment (risk of recession, inflation)</li> <li>→ Infrastructure access challenges (freight congestion, speed issues, blockades)</li> <li>→ Reduced capacity due to aging fleet</li> <li>→ Maintaining service levels and on-time performance due to recent restrictions</li> </ul> |    | <p>The Corporation will continue to face capacity issues until the new Corridor fleet is fully in service. Furthermore, the uncertainty related to potential recessions with the recent imposition of tariffs as well as restrictions imposed by host railway partner could hinder the Corporation’s ability to achieve its revenue plan and require additional containment measures to compensate for lost revenues.</p>   |
| <b>Asset Management</b>  |   |   |
| <p>Most of the Corporation’s rolling stock equipment, used for non-Corridor services, has essentially reached the end of its operating life. Its reliability has deteriorated in the past few years, resulting in delays and additional operating costs to maintain a state of good repair.</p> <p>Increased maintenance costs and reduced availability of equipment in upcoming years are to be expected until a replacement fleet is introduced.</p>   |  | <p>In Budget 2024, the Government of Canada confirmed its commitment to replace the Heritage Fleet and Treasury Board of Canada confirmed, on October 10, 2024, that new funding is approved in order to replace our long-distance, regional and remote rail fleet. As the procurement process begins, the Corporation maintenance teams will continue to ensure that the existing fleet operates safely and effectively.</p> <p>The Corporation is running an aging fleet, for which the average age of the cars is 77 years, requiring more inspections and repairs. Substantial investments will therefore be required to keep as much equipment in operating conditions until it is replaced by a new fleet. However, the Corporation could still be forced to prematurely retire some of its fleet, as a result of which service revenues and costs will be negatively impacted in the future.</p> <p>The Corporation manages an aging real estate infrastructure with a historical maintenance deficit of \$450 million that will need to be addressed in the coming years.</p> |

 Increasing    
  Stable    
  Decreasing

## 6. Risk Analysis (cont’d)

| Nature of Risk  | Trend   | Current Situation  |
|---|---|--|
| <b>Operational Security and Safety</b>  |   |  |
| <p>Events such as collisions, derailments and pedestrian accidents may negatively impact revenues. Such events and new regulations on grade crossings may also result in significant non-budgeted costs for the Corporation.</p>                                      |    | <p>The Corporation, through its enhanced Safety Management System (SMS), applies operational procedures and controls which ensure compliance with railway safety requirements.</p> <p>The Corporation also completes regular inspections of its equipment, stations and infrastructure. These activities are carried on managing and mitigating the safety risks of our railway operations, as well as the potential significant unexpected costs which may result from the Corporation’s operations.</p> <p>With regards to the new regulatory requirements on grade crossings issued by Transport Canada, the effective date at which work must be completed has been extended beyond the original implementation date of November 27, 2021. The Corporation has completed the work on its infrastructure, and work is currently underway on third-party owned infrastructure on which the Corporation operates.</p> |
| <b>Access to Third-Party Assets</b>   |   |  |
| <p>The services provided by host railways have been deteriorating during the past few years, resulting in declining on-time performance, which resulted in increased operating costs, and which could lead to lower customer satisfaction and revenue generation.</p> |  | <p>On-time performance has deteriorated since the beginning of the year, down to 54 percent for the year. The deterioration was seen across all the network, including the Corridor where on-time performance decreased from 69 percent during the first quarter to 54 percent in the fourth quarter. Poor on-time performance and associated delays could have a negative impact on customer satisfaction and ridership and could hinder the Corporation’s efforts to bring passengers back on the trains. Management is working with infrastructure owners to address the situation and improve on-time performance.</p>   |

Increasing

Stable

Decreasing

## 6. Risk Analysis (cont’d)

| Nature of Risk  | Trend   | Current Situation  |
|---|---|--|
| <b>Use of Technology and Cybersecurity</b>  |   |  |
| <p>As part of regular business operations, the Corporation collects, processes and stores sensitive data, including personal information of passengers, employees and information of business partners. Any technology system failure, degradation, interruption or misuse, security breach, inefficient migration to a new system, or failure to comply with applicable data confidentiality, privacy, security or other related obligations, could adversely affect the Corporation’s reputation. It could also expose the Corporation to litigation, claims for contract breach, fines, sanctions or remediation costs or otherwise materially and adversely affect its operations. Any of the previous could have a material adverse effect on the Corporation, its business, results from operations and financial conditions.</p> |    | <p>The Corporation relies heavily on technology to operate its business, including to increase its revenues and reduce its costs. Technology systems are at risk of cybersecurity incidents, and it is generally viewed that cyber-attacks have increased and will continue to increase in both occurrence and complexity. The Corporation invests in security initiatives such as employee awareness training and third-party assessment of controls as well as in disaster recovery plans; these initiatives may, however, not be successful or adequately address this evolving risk.</p> |
| <b>Talent Management</b>  |   |  |
| <p>The Corporation’s workforce is mature and many employees could retire in the next few years, including some with specific technical skills. Furthermore, the employment market has been increasingly competitive. Without proper succession planning and strategies to attract and retain employees, key knowledge and competencies could be lost.</p> <p>The situation could result in loss of productivity and increased costs.</p>  |  | <p>The Corporation has put in place an apprenticeship program for skilled technical positions and ensures successful transfer of knowledge, and the Corporation has continued its locomotive engineer training program to have a sufficient workforce given potential upcoming retirements and is currently recruiting for additional classes.</p>   |

Increasing

Stable

Decreasing

## 6. Risk Analysis (cont’d)

| Nature of Risk  | Trend   | Current Situation   |
|---|---|---|
| <b>Climate Change</b>   |   |   |
| <p>The Corporation is subject to climate change-related risks. Climate-related physical risks like the rise in extreme weather events or increase of weather variability could delay or interrupt operations and services and negatively impact the Corporation’s on-time performance, schedules, revenue generation and could increase operating costs. Also, transition risks that arise from the transition to a low-carbon economy such as changes in environmental regulations, including increased carbon pricing or new regulations prescribing increased efficiency, could increase the Corporation’s operating costs or investment in more fuel-efficient rolling stock.</p> |  | <p>The Corporation deployed a five-year sustainability plan based on environmental, social and governance priorities that will help reduce its environmental footprint, enhance its role as a responsible transportation provider and create lasting value for present and future generations. Related to the plan’s Climate Action priority, the Corporation is working on three strategies:</p> <ol style="list-style-type: none"> <li>1. Upgrade greenhouse gas (GHG) emissions reduction targets to support Canada’s 2050 net-zero emissions ambition;</li> <li>2. Improve fuel and energy efficiency in all operations;</li> <li>3. Complete a review of climate change risks and implement an action plan.</li> </ol> <p>In 2023, the Corporation progressed on further identifying, understanding and managing climate risks and opportunities, namely by:</p> <ol style="list-style-type: none"> <li>1. Undertaking a climate scenario analysis looking at two scenarios (high emissions and low emissions) and time horizons to further refine understanding of main climate risks and opportunities and their potential impact on the Corporation.</li> <li>2. Delivering a climate change awareness session to key leaders.</li> <li>3. Consolidating business responses to map out how it is prepared to face climate risks and opportunities.</li> <li>4. Integrating material categories of scope 3 GHG emissions (all other emissions inventory, following the identification and quantification work completed in 2022.)</li> </ol> <p>The Corporation also finalized its detailed decarbonization plan which identifies short, medium and long-term initiatives, as well as major operational, financial and technological challenges in decarbonizing our operations.</p> |

Increasing

Stable

Decreasing

## 7. Outlook

Results of the fourth quarter improved compared to the corresponding quarter of 2023 in terms of revenues and ridership, as the Corporation has now deployed its maximal available capacity and reintroduced an optimal number of frequencies across the network.

The reintroduction of frequencies in services which do not all cover their costs, as well as higher costs resulting from current inflation rates have increased the Corporation's deficit and could result in a funding shortfall for future Government fiscal years.

In the meantime, work progresses to implement initiatives to streamline processes and minimize operating costs as part of the Corporation's continuous improvement journey, while communications continue with third-party infrastructure owners to improve on-time performance and protect the Corporation's operations on their network. Due to recent developments with one of the third-party owners, the Corporation is facing disruptions in access and on-time performance, which is affecting the Corporation's performance.

In addition, strategic projects such as the Corridor Fleet Replacement Program and the new reservation system have reached important milestones with the introduction of additional train sets of the new fleet operating on various routes across the Corridor, and the launch of the application (app) for the new reservation system in November 2023 with additional features to be introduced as part of the next phase of the project. In parallel, the Corporation is launching a reliability program designed to complement the scope of the Heritage Fleet Modernization program. These investments will improve the reliability of the Heritage Fleet but cannot guarantee the availability of the entire fleet until the arrival of the new trains.

# Financial Statements

For the year ended December 31, 2024

## Management's Responsibility Statement

Year ended December 31, 2024

Management of the Corporation is responsible for the preparation and fair presentation of the financial statements contained in the Annual Report. These financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS Accounting Standards) and necessarily include certain amounts that are based on management's best estimates and judgement. Financial information contained throughout the Annual Report is consistent with that in the financial statements. Management considers that the financial statements present fairly the financial position of the Corporation and its financial performance and its cash flows.

To fulfil its responsibility, the Corporation maintains systems of internal controls, policies and procedures to ensure the reliability of financial information and the safeguarding of assets. Transactions are properly authorized and are in accordance with the relevant legislation, by-laws of the Corporation and Government directives; resources are managed efficiently and economically; and operations are carried out effectively.

The Board of Directors is responsible for ensuring that Management fulfils its responsibilities for financial reporting and internal control. The Board exercises its responsibilities through the Audit & Pension Investment Committee of the Board of Directors, consisting of five independent Directors who are independent in accordance with the Corporation's standards of independence,

meets periodically with the internal auditors Deloitte and external auditors and with management, to review the scope of their audits and to assess reports on audit work performed. It is responsible for reviewing the financial statements and annual report.

The Board of Directors, on the recommendation of the Audit & Pension Investment Committee, approved the financial statements.

The external auditor, the Auditor General of Canada, has audited the Corporation's financial statements for the year ended December 31, 2024, and her report indicates the scope of her audit and her opinion on the financial statements.

## INDEPENDENT AUDITOR'S REPORT

To the Minister of Transport and Internal Trade

### Report on the Audit of the Financial Statements

#### *Opinion*

We have audited the financial statements of VIA Rail Canada Inc., which comprise the statement of financial position as at 31 December 2024, and the statement of comprehensive income, statement of changes in shareholder's equity and statement of cash flows for the year then ended, and notes to the financial statements, including material accounting policy information.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of VIA Rail Canada Inc. as at 31 December 2024, and its financial performance and its cash flows for the year then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board (IASB).

#### *Basis for Opinion*

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of VIA Rail Canada Inc. in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

### *Other Information*

Management is responsible for the other information. The other information comprises the information included in the annual report, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

### *Responsibilities of Management and Those Charged with Governance for the Financial Statements*

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing VIA Rail Canada Inc.'s ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate VIA Rail Canada Inc. or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing VIA Rail Canada Inc.'s financial reporting process.

### *Auditor's Responsibilities for the Audit of the Financial Statements*

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of VIA Rail Canada Inc.'s internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on VIA Rail Canada Inc.'s ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause VIA Rail Canada Inc. to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

## Report on Compliance with Specified Authorities

### *Opinion*

In conjunction with the audit of the financial statements, we have audited transactions of VIA Rail Canada Inc. coming to our notice for compliance with specified authorities. The specified authorities against which compliance was audited are Part X of the *Financial Administration Act* and regulations, the *Canada Business Corporations Act* and regulations, the articles and by-laws of VIA Rail Canada Inc., and the directives issued pursuant to section 89 of the *Financial Administration Act*.

In our opinion, the transactions of VIA Rail Canada Inc. that came to our notice during the audit of the financial statements have complied, in all material respects, with the specified authorities referred to above. Further, as required by the *Financial Administration Act*, we report that, in our opinion, the accounting principles in IFRS Accounting Standards as issued by the IASB have been applied on a basis consistent with that of the preceding year.

### *Responsibilities of Management for Compliance with Specified Authorities*

Management is responsible for VIA Rail Canada Inc.'s compliance with the specified authorities named above, and for such internal control as management determines is necessary to enable VIA Rail Canada Inc. to comply with the specified authorities.

### *Auditor's Responsibilities for the Audit of Compliance with Specified Authorities*

Our audit responsibilities include planning and performing procedures to provide an audit opinion and reporting on whether the transactions coming to our notice during the audit of the financial statements are in compliance with the specified authorities referred to above.

# Notes to the Financial Statements

Year ended December 31

## 1. Authority, Objectives and General Information

VIA Rail Canada Inc. is a Crown corporation named in Part I of Schedule III to the *Financial Administration Act* and is not an agent of His Majesty. The Corporation was incorporated in 1977 in Canada, under the *Canada Business Corporations Act*. The Corporation is subject to the provisions of *Income Tax Act*. The corporate headquarters is located at 3 Place Ville-Marie, Montréal (Québec). The Corporation's vision is to be a smarter way to move people with a mission to place passengers at the core of everything we do and strive to offer a safe, smart and valued travel experience across Canada. The Corporation uses the roadway infrastructure of other railway companies and relies on them to control train operations. The Corporation has one operating segment, passenger transportation and related services in Canada. The Corporation's activities are considered seasonal since passenger traffic increases significantly during the summer and holiday periods resulting in an increase in revenue for these same periods.

The Corporation is subject to a directive (P.C. 2013-1354) that was issued on December 9, 2013, and a related subsequent directive (P.C. 2016-443) that was issued on June 3, 2016, pursuant to sections 89.8 and 89.9 of the *Financial Administration Act*. As per these directives, the Corporation must obtain Treasury Board approval on the terms and conditions of employment of its non-unionized employees who are not appointed by Governor in Council. The Corporation confirms that the requirements of these directives have been met.

In July 2015, the Corporation was issued a directive (P.C. 2015-1114) pursuant to section 89(1) of the *Financial Administration Act* to align its travel, hospitality, conference and event expenditure policies, guidelines and practices with Treasury Board policies, directives and related instruments on travel, hospitality, conference and event expenditures in a manner that is consistent with its legal obligations and to report on the implementation of this directive in the Corporation's next corporate plan. The Corporation confirms that the requirements of the directive have been met.

## 1. Authority, Objectives and General Information (cont'd)

In March 2022, the Corporation was issued a directive (P.C. 2022-0259) pursuant to section 89 of the *Financial Administration Act* to:

- a) procure the incorporation under the *Canada Business Corporations Act* of a wholly owned subsidiary, the mandate of which is to develop and implement the High Frequency Rail project, including the design, construction, financing, operation and maintenance of passenger rail services in Ontario and Québec through one or more agreements with the private sector, in cooperation with the Minister of Transport;
- b) provide all necessary support, expertise, and cooperation to the subsidiary to facilitate the subsidiary's role and fulfilment of its mandate; and
- c) provide all necessary support, expertise, and cooperation to the Minister of Transport to facilitate the Minister's role in the development and implementation of the High Frequency Rail project.

The Corporation has incorporated the subsidiary, named VIA HFR – VIA TGF Inc. on November 29, 2022, and confirms that the Corporation will continue to implement the requirements of the directive. On June 20, 2024, Bill C-69, *An Act to implement certain provisions of the budget tabled in Parliament on April 16, 2024*, received royal assent. As a result, the subsidiary (VIA HFR – VIA TGF Inc.) became an agent of His Majesty in right of Canada, with retroactive effect to November 29, 2022, the date of its incorporation. A Crown corporation that has agent status enjoys the constitutional immunities, privileges and prerogatives that are enjoyed by the Crown and can bind the Crown by its acts.

These financial statements were approved and authorized for issue by the Board of Directors on March 28, 2025.

The Corporation has received the additional funding from the Government of Canada and has the adequate resources to operate for the foreseeable future. Management continues to adopt the going concern basis of accounting in preparing the financial statements.

## 2. Basis of Preparation

### a) Statement of compliance

The Corporation's financial statements have been prepared in accordance with the International Financial Reporting Standards (IFRS Accounting Standards).

### b) Basis of measurement

The financial statements have been prepared on the historical cost basis except when a specific IFRS Accounting Standards requires fair values measurement as explained in the accounting policies below.

### c) Functional and presentation currency

These financial statements are presented in Canadian dollars, which is the Corporation's functional currency. All financial information presented in Canadian dollars has been rounded to the nearest thousand in the Corporation's financial statements and rounded to the nearest million in the notes to the financial statements.

## 3. Changes in the Current Year

### New and revised IFRS Accounting Standards in issue but not yet effective

#### ***IFRS 18 Presentation and Disclosures in Financial Statements***

IFRS 18 replaces IAS 1 *Presentation of Financial Statements*, carrying forward many of the requirements in IAS 1 unchanged and complementing them with new

requirements. In addition, consequential amendments are made to other several IFRS accounting standards, such as: IAS 7 *Statement of Cash Flows*, IAS 8 *Accounting Policies, Changes in Accounting estimates and Errors*, which will be renamed *Basis of Preparation of Financial Statements*, and IFRS 7 *Financial Instruments: Disclosures*.

IFRS 18 introduces new requirements to:

- present specified categories and defined subtotals in the statement of profit or loss
- provide disclosures on management-defined performance measures (MPMs) in the notes to the financial statements
- improve aggregation and disaggregation.

An entity is required to apply IFRS 18 for annual reporting periods beginning on or after 1 January 2027, with earlier application permitted. The revised IAS 8 and IFRS 7, become effective when an entity applies IFRS 18. IFRS 18 requires retrospective application with specific transition provisions.

The Corporation anticipates that the application of this new IFRS accounting standard and its consequential amendments will have an impact on its financial statements in future periods.

### 3. Changes in the Current Year (cont'd)

#### Amendments to the classification and measurement of financial instruments (Amendments to IFRS 9 and IFRS 7)

In May 2024, the IASB issued targeted amendments to IFRS 9 *Financial Instruments* and IFRS 7 *Financial Instruments: Disclosure* which are effective for annual period beginning on or after January 1, 2026, with earlier application permitted. These amendments clarify the date of recognition and derecognition of some financial assets and liabilities, with a new exception for some financial liabilities settled through an electronic cash transfer system. They also add further guidance for assessing whether a financial asset meets the solely payments of principal and interest criterion and new disclosure for certain instruments. The Corporation is currently assessing the effect of these amendments and therefore the impact is not known yet as at the date of the financial statements.

### 4. Summary of Material Accounting Policy Information

The material accounting policy information followed by the Corporation are summarized as follows:

#### a) Funding from the Government of Canada

Operating funding, which pertains to services, activities and other undertakings of the Corporation for the management and operation of railway passenger services in Canada, is recorded as a reduction of the operating loss. The funding is determined on the basis of operating expenses less revenues excluding unrealized gains and losses on financial instruments, non-cash employee benefits, non-cash transactions relating to property, plant and equipment, intangible assets, right-of-use assets, lease liabilities, deferred income taxes, adjustment for accrued compensation and adjustment for VIA Préférence loyalty program and is based on the operating budget approved by the Government of Canada for each year.

Funding for depreciable property, plant and equipment and intangible assets is recorded as deferred capital funding in the Statement of Financial Position and is amortized on the same basis and over the same periods as the funded depreciable property, plant and equipment and intangible assets. Upon disposal of the funded depreciable property, plant and equipment and intangible assets, the Corporation recognizes into net income all remaining deferred capital funding related to the relevant assets.

#### 4. Summary of Material Accounting Policy Information (cont'd)

Funding for non-depreciable property, plant and equipment is recorded as deferred capital funding in the Statement of Financial Position and is amortized on the same basis and over the same periods as the related depreciable property, plant and equipment.

##### b) Unconsolidated structured entity

A structured entity is designed to achieve a specific business purpose and has been set up so that any voting or similar rights are not the dominant factor in deciding who controls the entity. An example is when voting rights relate only to administrative tasks and the relevant activities are directed by contractual arrangements.

A structured entity is not consolidated when the substance of the relationship between the Corporation and the structured entities indicate that the structured entities are not controlled by the Corporation.

The subsidiary (VIA HFR – VIA TGF Inc.) has been determined to be an unconsolidated structured entity as the Corporation is not deemed to have control over the subsidiary based on the criteria outlined in IFRS 10 (see note 5c) – Key Sources of Estimation Uncertainty and Critical Judgements for more information). Consequently, the structured entity has not been consolidated within the Corporation.

The address of the unconsolidated structured entity's registered office is 385, Avenue Viger West, Montréal (Québec).

##### c) Revenue recognition

###### i) Passenger revenues

Revenue related to train services is recorded as deferred revenue until the transportation service has been provided. The service is rendered to the customer as the train journey is made. The performance obligation is satisfied over time. The customer simultaneously receives and consumes the benefits provided by the Corporation's performance as the Corporation performs the train service.

For sales of on-train food and beverages and other revenues, revenues are recognized when control of the goods has transferred, being at the point the customer purchases the goods.

The Corporation offers its customers the opportunity to earn points in a loyalty program. This program allows customers to purchase additional services - future train tickets and other products from the accumulated VIA Préférence points. The Corporation considers that the awarding of points gives rise to a performance obligation separate from the purchase of the train ticket or other products, since they confer on the customer a significant right to which he would not have been entitled if he had not bought a train ticket. The customer pays in advance for future services. The consideration received in respect of ticket sales is split between the points awarded under the VIA Préférence loyalty

#### 4. Summary of Material Accounting Policy Information (cont'd)

program and the passenger transportation services. The amount allocated to the loyalty program is based on the probability of the awards being converted into train tickets. The probability is reviewed at the end of each annual reporting period. Revenue related to loyalty program points is recognized as deferred revenue until it is exchanged for train tickets or other products. When points are redeemed, the proceeds are determined by the number of points redeemed in exchange for train tickets and other products.

##### ii) Other revenues

###### Rental income and other

The Corporation enters into lease agreements as a lessor with respect to some of its stations and facilities. Leases for which the Corporation is a lessor are classified as finance or operating leases. Whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee, the contract is classified as finance lease. All other leases are classified as operating leases. Rental income from operating leases is recognized on a straight-line basis over the term of the relevant lease. For rental income and other revenues, the customer simultaneously receives and consumes the benefits provided by the Corporation's performance as the Corporation performs the services.

##### d) Materials

Materials, consisting primarily of items used for the maintenance of rolling stock, are valued at the lower of cost and net realizable value. The cost is determined using the weighted average method and net realizable value is defined as the replacement cost. Materials are presented net of the related obsolescence provision.

##### e) Property, Plant and Equipment

Property, plant and equipment are recorded at the cost, less accumulated depreciation and any accumulated impairment losses. The cost includes all expenditures directly attributable to the acquisition of the asset.

Projects in progress are recorded at cost and include direct costs of construction, materials, direct labour and overhead.

When major components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items of property, plant and equipment and are depreciated over their respective useful lives.

#### 4. Summary of Material Accounting Policy Information (cont'd)

The rolling stock cost of periodic major overhaul programs is capitalized as a separate component and depreciated over its expected useful life. Cost of regular maintenance activities to maintain the rolling stock in good condition is recorded as operating expenses as incurred.

Depreciation of property, plant and equipment is calculated on a straight-line basis, from the date they are available for use, at rates sufficient to depreciate the cost of property, plant and equipment, less their residual value, over their estimated useful lives except for leasehold improvements related to the lease of buildings and stations where the depreciation period is the shorter of the lease term or its estimated useful life.

The estimated useful lives are as follows:

|  | Years    |
|--|----------|
| Rolling stock                                | 2 to 58  |
| Maintenance buildings                        | 10 to 75 |
| Stations and facilities                      | 5 to 50  |
| Owned infrastructure                         | 10 to 50 |
| Leasehold improvements                       | 10 to 40 |
| Machinery and equipment                      | 5 to 25  |
| Computer hardware                            | 3 to 10  |
| Other property, plant and equipment (Note 1) | 3 to 25  |

Note 1: Other property, plant and equipment include mostly office furniture, luggage carts and security equipment.

The estimated useful life, depreciation method and residual value are reviewed at the end of each annual reporting period taking into account the nature of the assets, past experience, changing technologies and expectations for the in-service period of the assets, with the effect of any changes in estimate being accounted for on a prospective basis. No depreciation is provided for projects in progress and land.

Gains and losses on disposals of property, plant and equipment are determined by comparing the proceeds with the carrying amount of the asset and are recorded under "Loss on disposal of property, plant and equipment" in the Statement of Comprehensive Income.

#### 4. Summary of Material Accounting Policy Information (cont'd)

##### f) Intangible assets

Intangible assets acquired separately are recorded at cost less accumulated amortization and accumulated impairment losses.

Projects in progress are recorded at cost and include direct costs of development, direct labour and overhead.

Amortization is recorded on a straight-line basis over their estimated useful lives. The estimated useful life and amortization method are reviewed at the end of each annual reporting period, taking into account the nature of the assets, past experience, changing technologies and expectations for the in-service period of the assets, with the effect of any changes in estimate being accounted for on a prospective basis. No amortization is provided for projects in progress.

For internally generated intangible assets, the expenditure on research activities is recognized as an expense in the year in which it is incurred and the development expense from the development phase of an internal project is recognized as intangible assets if, and only if, all of the following have been demonstrated:

- the technical feasibility of completing the intangible asset so that it will be available for use or sale;
- the intention to complete the intangible asset and use or sell it;
- the ability to use or sell the intangible asset;

- how the intangible asset will generate probable future economic benefits;
- the availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset; and
- the ability to measure reliably the expenditure attributable to the intangible asset during its development.

The amount initially recognized for internally generated intangible assets is the sum of the expenditure incurred from the date when the intangible asset first meets the recognition criteria listed above. Where no internally generated intangible asset can be recognized, development expenditure is charged to net income in the year in which it is incurred.

The Corporation's intangible assets have a finite useful life and are amortized over their useful life according to the straight-line method over the following years:

|   | Years    |
|---|----------|
| Software                                | 3 to 10  |
| Rights of access to rail infrastructure | 38       |
| Other intangible assets                 | 10 to 25 |

Gains and losses on disposals of intangible assets are determined by comparing the proceeds with the carrying amount of the asset and are recorded under "Loss on disposal of intangible assets" in the Statement of Comprehensive Income.

## 4. Summary of Material Accounting Policy Information (cont'd)

### g) Right-of-use assets

The Corporation leases several assets including lands, stations, facilities, office spaces and information technology equipment in the normal course of its business.

The Corporation assesses whether a contract is or contains a lease, at inception of a contract. That is, if the contract conveys the right to control the use of an identified asset for a period in exchange for consideration. The Corporation recognizes a right-of-use asset and a corresponding lease liability with respect to all lease agreements in which it is the lessee, except for short-term leases (defined as leases which at the commencement date, have a term of 12 months or less) and leases of low-value assets.

The Corporation recognizes right-of-use assets at the commencement date of a lease (i.e. the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of the liabilities. The cost of right-of-use assets includes the amount of lease liability recognized, initial direct cost incurred, lease payments made at or before the commencement date, less any lease incentives received and an estimate of costs of dismantling and removing the underlying asset, if any.

Right-of-use assets are depreciated over the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. If a lease transfers ownership of the underlying asset or if the cost of the right-of-use asset reflects that the Corporation expects to exercise a purchase option, the related right-of-use asset is depreciated over the useful life of the underlying asset. The depreciation starts at the commencement date of the lease.

### h) Impairment of non-financial assets

The Corporation reviews at each Statement of Financial Position date whether there is any indication of impairment (obsolescence, physical deterioration, significant changes in the method of utilization, performances falling short of forecasts, decline in revenues, other external indicators) or reversal of impairment loss. Non-financial assets are considered to be impaired when there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the non-financial asset, the asset's carrying amount exceeds its recoverable amount. If there are indicators of impairment present, the asset's recoverable amount is estimated. Assets that are not yet available for use are tested for impairment at every reporting period regardless of whether an indicator exists.

#### 4. Summary of Material Accounting Policy Information (cont'd)

The recoverable amount of an asset is the greater of its value in use and its fair value less costs of disposal. The fair value is determined using the current replacement cost. The value in use is determined by the estimated present value of future cash flows generated by the asset.

The carrying amount of the Corporation's property, plant and equipment, intangible assets and right-of-use assets are reviewed at the cash-generating unit (CGU) level to determine whether there is any indication of impairment. For the purpose of impairment testing, a CGU is the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or group of assets. Assets are tested at the CGU level when they cannot be tested individually.

Under the Corporation's business model, no assets are considered to generate cash flows that are largely independent of the cash flows of other assets and liabilities. Instead, all assets interact to create the passenger train service which includes property, plant and equipment, right-of-use assets and intangible assets. These operations are funded by parliamentary appropriations, revenues from passengers and revenues from other sources. Overall levels of cash flows reflect public policy requirements and decisions. They reflect budgetary funding provided to the Corporation in its entirety.

An impairment loss is recognized in net income and calculated as the difference between the carrying amount and the recoverable amount.

When there is a reversal of impairment loss, the carrying amount of the asset is increased to the lower of the recoverable amount and the carrying amount (net of depreciation or amortization) that the asset would have had if previous impairment loss had not been recognized. The reversal of impairment loss is recognized in the Statement of Comprehensive Income.

##### i) Lease liabilities

###### The Corporation as a lessee:

The Corporation recognizes at the commencement date of the lease, a lease liability which is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted by using the lease's implicit rate. If this rate cannot be readily determined, the Corporation uses the incremental borrowing rate.

Lease payments included in the measurement of the lease liability are:

- Fixed lease payments (including in-substance fixed payments), less any lease incentives receivable;
- Variable lease payments that depend on an index or rate, initially measured using the index or rate at the commencement date;
- The amount expected to be payable by the lessee under residual value guarantees;

#### 4. Summary of Material Accounting Policy Information (cont'd)

- The exercise price of purchase options, if the lessee is reasonably certain to exercise the options; and
- Payments of penalties for terminating the lease, if the lease term reflects the exercise of an option to terminate the lease.

Variable lease payments that do not depend on an index or a rate are recognized as expenses in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Corporation uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable.

The Corporation recognizes non-lease components as expenses and records these expenses on a straight-line basis.

The lease liability is presented as a separate line in the Statement of Financial Position.

The lease liability is subsequently measured by increasing the carrying amount to reflect interest on the lease liability (using the effective interest rate method) and by reducing the carrying amount to reflect the lease payments made.

The Corporation remeasures the lease liability and makes a corresponding adjustment to the related right-of-use asset whenever:

- The lease term has changed or there is a change in the assessment of exercise of a purchase option, in which case the lease liability is remeasured by discounting the revised lease payments using a revised discount rate;
- The lease payments change due to variations in an index or rate or a change in expected payment under a guaranteed residual value, in which cases the lease liability is remeasured by discounting the revised lease payments using the initial discount rate (unless the lease payments change due to fluctuations in a floating interest rate, in which case a revised discount rate is used); and
- A lease contract is modified, and the lease modification is not accounted for as a separate lease, in which case the liability is remeasured by discounting the revised lease payments using a revised discount rate.

The Corporation's accounting policies as a lessor are described in Note 4 c) Revenue recognition ii) Rental income and other.

## 4. Summary of Material Accounting Policy Information (cont'd)

### Short-term leases and leases of low-value assets

The Corporation applies the short-term lease recognition exemption to its short-term leases (i.e. those with a lease term of 12 months or less from the commencement date and who do not contain a purchase option). The Corporation also applies the low-value asset recognition exemption to leases that are considered of low value (such as point-of-sale terminals). For these leases, the Corporation recognizes the lease payments as an operating expense on a straight-line basis over the term of the lease unless another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed.

### j) Provisions and contingencies

Provisions, including provisions for legal litigations, restructuring and environmental issues, are recognized when it becomes probable that a present obligation (legal or constructive) resulting from a past event will require a settlement and when the amount can be estimated reliably.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the Statement of Financial Position date, taking into account the risks and uncertainties surrounding the obligation. Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows.

In situations where the amount of the obligation cannot be measured with sufficient reliability or the cash outflows are not probable, a contingent liability is disclosed, unless the possibility of any outflow in settlements is remote.

### k) Income taxes

The Corporation utilizes the asset and liability method of accounting for taxes under which deferred income tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the financial statement carrying amount and the tax basis of assets and liabilities. Deferred income tax assets and liabilities are measured using enacted or substantively enacted tax rates that are expected to apply for the year in which those temporary differences are expected to be recovered or settled. The effect on deferred income tax assets and liabilities of a change in tax rates is recognized in net income in the year based on tax rates that have been enacted, or substantially enacted, by the end of the reporting period. Deferred income tax assets are recognized to the extent that realization is considered probable.

## 4. Summary of Material Accounting Policy Information (cont'd)

### I) Employee benefits

#### i) Defined benefit component of the pension plans and other employee benefit plans

The Corporation's obligations for the defined benefit component of the pension plans as well as for other employee benefit plans (post-retirement medical and life insurance benefits) are actuarially determined using the projected unit credit method and management's best estimate. The present value of the defined benefit obligations is calculated using discount rates based on an interest rate curve that represents the yields on corporate AA bonds. The Canadian Institute of Actuaries' (CIA) calculation model establishes the rates for longer maturities by extrapolating the yield curve to maturity of AA-rated corporate bonds based on the observed relationship between the yields of AA-rated corporate bonds or A-rated corporate bonds and those of provincial AA-rated bonds in the medium-term maturity range. This relationship is then transposed to the universe of provincial AA-rated bonds with longer maturities to extrapolate the bond yields of AA-rated corporate bonds.

The Corporation determines the net interest expense on the net defined benefit liability for the year by applying the discount rate used to measure the defined obligation at the beginning of the year to the net defined benefit liability.

The current service costs, the net interest expense on the net defined benefit liability, the gains and losses on curtailment or settlement and plan amendments are recognized in net income in the year they are incurred.

Remeasurements arising from defined benefit component of the pension plans and other employee benefit plans comprised of changes in demographic assumptions, and in financial assumptions and experience adjustments, etc. are recognized in other comprehensive income in the year they are incurred.

#### ii) Defined contributions pension plan

Employer contributions related to the defined contribution component of the pension plan are recognized as an expense when employees render the service entitling them to contributions.

#### 4. Summary of Material Accounting Policy Information (cont'd)

##### iii) Employment benefits other than post-employment benefits

The Corporation provides employment benefits other than post-employment benefits as follows:

- Compensation and short-term employee benefits include the annual salary, performance bonuses, paid vacations not included in the annual salary, short-term sick leave, health, dental and life insurance benefits. These benefits are measured on an undiscounted basis and are expensed as the related service is provided.
- Long-term employee benefits include workers' compensation benefits as well as long-term disability benefits and continuation of benefit coverage for employees on long-term disability.

The actuarial obligation for workers' compensation benefits is calculated on an event-driven basis. The method involves dividing the obligation into two distinct components: awarded pensions and future awards. The actuarial obligation for awarded pensions is the actuarial present value of all future projected payments for the award determined as at the valuation date. The actuarial obligation for future awards is the discounted value of expected cash flow for awards yet to be made. The Corporation is self-insured for its workers' compensation benefits.

The actuarial obligation for other long-term disability benefits and continuation of benefit coverage for employees on long-term disability is calculated on an event-driven basis. This method incorporates management's best estimate of cost escalation as well as demographic and other financial assumptions.

Actuarial gains and losses and other changes in the Corporation's obligations are recognized in net income in the year in which they arise.

- Termination benefits include benefits that are payable when an employment contract is terminated before the normal retirement date. They are recognized as a liability and expense for termination benefits at the earlier of the following dates:
  - (a) when the Corporation can no longer withdraw the offer of those benefits; and
  - (b) when the Corporation recognizes costs for a restructuring (provision) and involves the payment of termination benefits.

## 4. Summary of Material Accounting Policy Information (cont'd)

### m) Financial instruments

#### i) Financial assets

##### Classification and measurement

Financial assets are measured at fair value at initial recognition, and subsequently measured at amortized cost or at fair value through profit or loss (FVTPL).

With the exception for trade and other receivables that do not contain a significant financing component for which the Corporation has applied the practical expedient, the Corporation measures a financial asset at its fair value plus, in the case of a financial asset not at FVTPL, transaction costs. Transaction costs directly attributable to the acquisition of financial assets at FVTPL are recognized immediately in net income.

##### Financial assets at amortized cost

This category is the most relevant for the Corporation. The Corporation measures financial assets at amortized cost if both of the following conditions are met:

- The financial asset is held within a business model with the objective to hold financial assets to collect contractual cash flows and,
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at amortized cost are subsequently measured using the effective interest method and are subject to impairment. Gains and losses are recognized in net income when the asset is derecognized, modified or impaired.

##### Impairment of financial assets

The Corporation recognizes a loss allowance for expected credit losses (ECLs) for all financial assets not held at FVTPL. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Corporation expects to receive, discounted at an approximation of the original effective interest rate.

For trade and other receivables, the Corporation applies a simplified approach in calculating ECLs which is possible under IFRS 9 when certain conditions apply. The Corporation uses the practical expedient and does not need to adjust the promised amount of consideration for the effects of a significant financing component if the Corporation expects, at contract inception, that the period between when the Corporation performs the service to a customer and when the customer pays for that service will be one year or less. Therefore, the Corporation recognizes a

#### 4. Summary of Material Accounting Policy Information (cont'd)

loss allowance based on lifetime ECLs at each reporting date. The Corporation has established a loss allowance matrix that is based on past default experience of the debtor, adjusted as appropriate to reflect current conditions and estimates of future economic conditions. Amounts considered uncollectible are written off and are included in the "Other" expenses line item in the Statement of Comprehensive Income.

The Corporation does not recognize an ECL for cash and Asset Renewal Fund as they comprise solely of cash.

##### ii) Financial liabilities

###### Recognition and measurement

Financial liabilities are measured at fair value at initial recognition, and subsequently measured at amortized cost, or at fair value through profit or loss (FVTPL).

###### Financial liabilities at amortized cost

A financial liability that is not a contingent consideration from an acquirer in a business combination, held for trading, or designated at FVTPL is subsequently measured at amortized cost using the effective interest rate method.

Gains and losses are recognized in net income when the financial liabilities are derecognized as well as through the effective interest rate method amortization process.

Amortized cost is calculated by considering any discount or premium on acquisition and fees or costs that are an integral part of the effective interest rate method.

###### Financial instruments measured at FVTPL

Financial instruments at FVTPL include financial assets and financial liabilities that are incurred for repurchasing in the near term and financial assets and financial liabilities designated upon initial recognition as at FVTPL.

Gains or losses on financial instruments classified at FVTPL are recognized in net income.

##### iii) Derivative financial instruments

###### Initial recognition and subsequent measurement

The Corporation uses derivative financial instruments, such as commodity swaps, to manage its exposure to fuel price risk.

Derivatives are initially recognized at fair value at the date on which a derivative contract is entered and are subsequently remeasured at fair value at the reporting date of each reporting period. Any resulting fair value changes are recognized immediately through profit and loss in the line "Unrealized (net gain) net loss on derivative financial instruments".

#### 4. Summary of Material Accounting Policy Information (cont'd)

Derivative financial instruments are grouped into three levels of a fair value hierarchy. The three levels are defined based on the observability of significant inputs to the measurement as follows:

Level 1 – Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2 – Inputs other than quoted prices included within Level 1 that are observable for asset or liability, either directly or indirectly.

Level 3 – Unobservable inputs for the asset or liability.

The following table summarizes the financial assets and financial liabilities held by the Corporation measured at fair value at the end of each reporting period. The table also discloses information about how the fair value of these financial assets and financial liabilities are determined and their fair value hierarchy:

| Financial assets / financial liabilities           | Fair value hierarchy | Valuation technique(s)  | Significant unobservable inputs | Relationship unobservable inputs to fair value |
|--|----------------------|---|---------------------------------|--|
| Derivative financial instruments – commodity swaps | Level 2              | Discounted cash flow. Future cash flows are estimated based on commodity swap price (from observable commodity market price at the end of the reporting period) and contract commodity swap price, discounted at a market rate that reflects the credit risk of various counterparties. | N/A                             | N/A  |

#### 4. Summary of Material Accounting Policy Information (cont'd)

The following table summarizes the financial assets and financial liabilities held by the Corporation and their classification as well as the initial and subsequent measurement method at the end of each reporting period. The fair value approximates carrying value due to the short deadline, except for other payables.

| Classification                            | Applicable to   | Initial measurement                    | Subsequent measurement                                  | Recognition of income/expense and gain/loss on remeasurement, if any |
|---|---|--|---|--|
| Amortized cost                            | <ul style="list-style-type: none"> <li>• Cash</li> <li>• Trade and other receivables</li> <li>• Current advances to third parties</li> <li>• Other assets</li> <li>• Trade and other payables</li> <li>• Other payables (Note 1)</li> </ul> | Fair value including transaction costs | Amortized cost using the effective interest rate method | Net income   |
| Fair value through profit or loss (FVTPL) | Derivative financial instruments (Note 2)   | Fair value                             | Fair value  | Net income   |

Note 1: Due to the nature of these financial instruments, their fair value approximates their carrying amount.

Note 2: Comprised of derivative financial instruments not designated in a hedging relationship.

## 5. Key Sources of Estimation Uncertainty and Critical Judgements

In the application of the Corporation accounting policies, management is required to make certain assumptions, estimates and judgements that affect the reported amounts of revenues, expenses, assets and liabilities, and the disclosure of contingent liabilities, at the reporting date. They are reviewed on an ongoing basis. Changes to accounting estimates are recognized in the period in which the estimates are revised and in any future period affected. However, uncertainties relating to assumptions, estimates and judgements could result in outcomes that would require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

Other disclosure relating to the Corporation's exposure to risks and uncertainties are included in Note 21.

### Judgements

In the process of applying the Corporation's accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognized in the financial statements.

#### a) Determining the lease term of contracts with renewal and termination options

When the Corporation recognizes a lease as a lessee, it assesses the lease term based on the conditions of the lease. The lease term is the non-cancellable term of the lease, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised, and any periods covered by an option to terminate the lease, if it is reasonably certain not to be

exercised. The Corporation has several lease contracts that include extension and termination options. The Corporation considers all relevant factors that create an economic incentive for it to exercise either the renewal or termination. The Corporation reassesses the amount recognized as right-of-use asset and lease liability if there is a significant event or change in circumstances that is within its control and affects its ability to exercise or not to exercise the option to renew or to terminate.

#### b) Determining the value of the projects in progress

Management uses judgement in determining the percentage of completion of the projects in progress as well as the value of the activities performed for these projects and reviews progress on a regular basis. Percentage of completion and value of the projects in progress reflect management's best assessment and are assessed by taking in consideration all information available at the reporting date. Actual amounts of projects in progress could differ from best assessment of management.

#### c) Unconsolidated structured entity

The Corporation has an investment in an unconsolidated structured entity, through its common voting share investment. Management exercises judgement in determining whether or not the Corporation has control on the structured entity, its wholly owned subsidiary, and consequently whether or not it should consolidate the financial results of the structured entity.

## 5. Key Sources of Estimation Uncertainty and Critical Judgements (cont'd)

Although the Corporation has the power to appoint or remove directors through its common voting interest, it must do so in consultation with the Minister of Transport and cannot unilaterally appoint or remove directors, thereby limiting its power over the day-to-day activities of the structured entity. In addition, through agreements with VIA HFR – VIA TGF Inc. and Minister of Transport, the Corporation's rights to obtain dividends are limited in that Transport Canada approval must be obtained and the Government of Canada must approve any such requests via the VIA HFR – VIA TGF Inc.'s Corporate Plan and the Board of Directors. With the status change of VIA HFR – VIA TGF Inc. on June 2024 to an agent corporation, the net assets on wind-up or liquidation will remain the property of the Crown instead of the Corporation.

Accordingly, while the Corporation has power over certain activities of the structured entity it is not able to use those powers to influence its returns. Therefore, although the Corporation owns the outstanding common share of the structured entity, it does not consolidate its operations because the Corporation does not have the ability to affect the returns from the common share investment through its power over the entity. The maximum exposure to loss is determined by considering the nature of the interest in the unconsolidated structured entity. As at December 31, 2024, the maximum exposure to the Corporation for financial risk related to the structured entity is reflected by the carrying amount of its investment in the statement of financial position of \$1 and the collection of account receivable from VIA HFR – VIA TGF Inc.

### Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, which are not included in other notes, are described below. The Corporation based its assumptions and estimates on parameters available when the financial statements were prepared. Estimates and assumptions are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Corporation.

#### a) Useful lives of depreciable assets

The key estimate used for Property, plant and equipment and intangible assets is their useful lives. When determining the expected useful lives of these assets, management takes into account the nature of the assets, past experience, changing technologies and expectations for the in-service period of the assets. Management reviews the useful lives of depreciable assets annually.

## 5. Key Sources of Estimation Uncertainty and Critical Judgements (cont'd)

### b) VIA Préférence Loyalty Program

The VIA Préférence loyalty program allows members to acquire "award points" as they travel on the train. These award points entitle members to free travel and other products on the Corporation's trains. In determining the fair value of the award points recorded as deferred revenues, the Corporation takes into consideration the probability of the awards being converted into train tickets. The estimated probabilities on point redemption are based on management experience and on changing customer behaviour and may not reflect the actual redemption rate in the future. Any significant changes in customers' redemption patterns will impact the estimated redemption rate. As such, the amount allocated between the transportation service and the award points may have been significantly different if different probability estimates had been used.

The Corporation also estimates the stand-alone selling price of the loyalty points awarded under the VIA Préférence loyalty program. As points issued under the program are not sold to third parties, estimates of the stand-alone selling price are subject to significant uncertainty. The stand-alone selling price of the loyalty points awarded is based on the average points spent on train tickets and the average fares.

### c) Post-employment and other employee benefits

Except for the defined contribution component of the pension plans, the cost of post-employment and other employee benefits and the present value of the related obligations are determined using actuarial valuations. The actuarial valuation involves making assumptions about discount rates used to measure the obligations, expected future salary increases, expected retirement age, expected mortality rates, expected health care cost trends, expected inflation and expected future pension increase. When determining these assumptions, management takes into account past experience, current market conditions and rates, and the expertise of its actuaries. Due to the complexities involved in the valuation and the long-term nature of these plans, such estimates are subject to significant uncertainty. All assumptions are reviewed at each reporting period. Actual results may differ from results that are estimated based on assumptions.

The parameter most subject to change is the discount rate. In determining the appropriate discount rate, management considers the interest rates of corporate bonds with at least an "AA" rating or above, as set by internationally recognized credit rating agency, and extrapolated as needed along the yield curve to correspond with the expected term of the defined benefit obligation. The underlying bonds are further reviewed for quality corporate bonds.

## 5. Key Sources of Estimation Uncertainty and Critical Judgements (cont'd)

The mortality rate is based on publicly available mortality tables. Those mortality tables tend to change only at intervals in response to demographic changes. Future salary increases and pension increases are based on expected future inflation rates.

A sensitivity analysis of key assumptions is presented in Note 16.

### d) Income taxes

Management uses judgement and estimates in determining the appropriate rates and amounts in recording deferred income taxes, giving consideration to timing and probability of realization. Actual taxes could significantly vary from these estimates as a result of a variety of factors including future events, changes in income tax law or the outcome of reviews by tax authorities and related appeals. The Corporation has recognized deferred income tax assets on its deductible temporary differences and unused tax losses as it has determined that it is probable that taxable profit will be available against which the deductible temporary differences and unused tax losses can be utilized. The resolution of these uncertainties and the associated final taxes may result in adjustments to the Corporation's deferred and current income tax assets and liabilities.

### e) Impairment of non-financial assets

Impairment exists when the carrying value of an asset or cash generating unit exceeds its recoverable amount,

which is the higher of its fair value less costs of disposal and its value in use. The Corporation uses judgement in assessing, at each reporting date, whether there is any indication that non-financial assets may have lost value requiring the completion of an impairment test. These tests are designed, in part, to determine a recoverable amount, which is the fair value, based on current replacement cost, less costs of disposal. The current replacement cost and the costs of disposal calculations are based on management's best estimates. Differences in estimates could materially affect the financial statements in determining both the impairment existence and the amount of impairment.

### f) Lease liabilities: estimating the incremental borrowing rate

Accounting standards require the Corporation to discount the lease payments using the rate implicit in the lease if that rate is readily available. If that rate cannot be readily determined, the lessee is required to use its incremental borrowing rate (IBR). The determination of the IBR requires the use of various assumptions which, if different from those being used, could result in a significant impact in the amount recognized as right-of-use asset and lease liability, as well as in the amount of depreciation of right-of-use asset and interest expense on lease liability. The Corporation estimates the IBR using observable inputs (such as market interest rates) when available and is required to make certain entity-specific estimates.

## 6. Trade and Other Receivables

The trade and other receivables balance includes the following:

| (in millions of Canadian dollars)   | 2024         | 2023         |
|---|--------------|--------------|
| Trade   | 6.3          | 9.1          |
| Other receivables   | 7.2          | 7.0          |
| Loss allowance  | (0.9)        | (0.3)        |
| <b>Trade and other receivables classified at Amortized cost</b>                             | <b>12.6</b>  | <b>15.8</b>  |
| Amount receivable from the Government of Canada – Operating funding                         | 119.5        | 80.6         |
| Amount (payable to) receivable from the Government of Canada - Capital funding<br>(Note 20) | (2.3)        | 81.3         |
| Total receivable from the Government of Canada  | 117.2        | 161.9        |
| Sales taxes   | 12.5         | 11.3         |
| <b>Total trade and other receivables</b>  | <b>142.3</b> | <b>189.0</b> |

All trade and other receivables amounts have short-term maturities. Their net book values correspond to a reasonable approximation of their fair value.

The maturity of the trade and other receivables over 30 days is detailed in the following table:

| (in millions of Canadian dollars) | 2024       | 2023       |
|-----------------------------------|------------|------------|
| 31 to 60 days                     | 1.4        | 1.6        |
| 61 to 90 days                     | 1.1        | 0.6        |
| Over 90 days                      | 0.2        | 0.1        |
| <b>Total</b>                      | <b>2.7</b> | <b>2.3</b> |

The Corporation has recognized in the current year an amount of \$1.1 million impairment loss arising from contracts with customers and other receivables, which is presented in the line "Other" in the Statement of Comprehensive Income (December 31, 2023: \$0.5 million).

## 7. Materials

The materials balance includes the following:

| (in millions of Canadian dollars) | 2024        | 2023        |
|-----------------------------------|-------------|-------------|

Note 1: The carrying amount of the new reservation system is \$95.5 million (December 31, 2022: nil) will be fully amortized in 10 years.

## 11. Trade and Other Payables

The trade and other payables balance includes the following:

| (in millions of Canadian dollars)                             | 2024         | 2023         |
|---|--------------|--------------|
| Wages payable and accrued                                     | 53.2         | 61.3         |
| Accounts payable and accruals – Trade                         | 65.3         | 62.5         |
| Accounts payable and accruals – Capital assets*               | 126.6        | 129.5        |
| <b>Trade and other payables classified at Amortized cost*</b> | <b>245.1</b> | <b>253.3</b> |
| Other   | 10.4         | 7.2          |
| <b>Total trade and other payables*</b>                        | <b>255.5</b> | <b>260.5</b> |

\*Certain comparative figures have been reclassified to conform to the current year's presentation (Note 24).

## 12. Leases

### The Corporation as a lessee:

The Corporation leases several assets including land, office spaces, stations and facilities and information technology equipment. Lease of land has a lease term of 29 years, leases of office spaces have lease terms between 3 years and 12 years, leases of stations and facilities have lease terms between 5 and 40 years, while information technology equipment has lease terms of 5 years.

The Corporation also has certain leases with lease terms of 12 months or less and leases of equipment with low value.

The carrying amounts of right-of-use assets recognized and the movement during the period are as follows:

| (in millions of Canadian dollars)     | Land       | Office spaces | Stations and facilities | Information technology equipment | Total        |
|---------------------------------------|------------|---------------|-------------------------|----------------------------------|--------------|
| <b>Cost:</b>                          |            |               |                         |                                  |              |
| January 1, 2024                       | 0.5        | 21.8          | 83.6                    | 0.8                              | 106.7        |
| Additions                             | -          | 0.3           | 1.7                     | 0.1                              | 2.1          |

## 12. Leases (cont'd)

### Amount recognized in the Statement of Comprehensive Income:

| (in millions of Canadian dollars)    | December 31, 2024 | December 31, 2023 |
|--------------------------------------|-------------------|-------------------|
| Expense relating to low-value assets | 0.2               | 0.2               |

Total cash outflow is \$6.5 million (December 31, 2023: \$6.6 million).

The table below indicates the maturity of the lease liabilities based on contractual undiscounted payments as at December 31:

| (in millions of Canadian dollars) | 2024         | 2023*        |
|-----------------------------------|--------------|--------------|
| Less than 1 year                  | 6.4          | 6.2          |
| 1 to 2 years                      | 6.4          | 6.2          |
| More than 2 years                 | 140.2        | 144.0        |
| <b>Total</b>                      | <b>153.0</b> | <b>156.4</b> |

*\*During the current year, the Corporation revised the time bands used to provide the contractual maturities for the lease liabilities and disclosed less time bands to better meet the needs of the financial statements' users. As a result, comparative figures have been reclassified to conform to the current year's presentation.*

## 12. Leases (cont'd)

The carrying amounts of lease liabilities and the movements of the period are as follows:

| (in millions of Canadian dollars) | 2024        | 2023  |
|-----------------------------------|-------------|-------|
| <b>Balance, beginning of year</b> | 100.6       | 103.9 |
| Additions                         | 2.1         | 2.3   |
| Accretion of interest             | 2.9         | 2.5   |
| Payments                          | (6.3)       | (6.4) |
| Termination                       | –           | (1.7) |
| <b>Balance, end of period</b>     | <b>99.3</b> | 100.6 |
| Current                           | 3.4         | 2.3   |
| Non-current                       | 95.9        | 98.3  |
| <b>Total lease liabilities</b>    | <b>99.3</b> | 100.6 |

| DECEMBER 31, 2024  | Lease contracts number | Fixed payments (%) | Variable payments (%) |
|--|------------------------|--------------------|-----------------------|
| Land leases with payments linked to inflation                    | 1                      | –                  | 0.4                   |
| Office space leases with fixed payments                          | 4                      | 19.2               | –                     |

## 12. Leases (cont'd)

### The Corporation as a lessor:

The Corporation has entered into leases on some of its assets, such as stations and facilities. These leases have terms between 2 and 20 years. Some leases include a clause to enable upward revision of the rental charge on an annual basis according to prevailing market conditions. Some of these operating lease contracts contain a market review clause in the event that the lessee exercises its option to renew. The lessee does not have an option to purchase the property at the end of the expiry of the lease period. The Corporation has determined, based on an evaluation of the terms and conditions of the leases, such as the lease term not constituting a major part of the economic life of the property and the present value of the minimum lease payments not amounting to substantially all of the fair value of the property and that the Corporation retains substantially all the risks and reward to ownership of the properties and accounts for the contracts as operating leases.

Rental income recognized by the Corporation during the year is \$8.5 million (December 31, 2023: \$8.4 million).

Future minimum rentals receivable under non-cancellable operating leases as at December 31, 2024, are as follows:

(in millions of Canadian dollars)

|                 |            |
|-----------------|------------|
| Year 1          | 2.3        |
| Year 2          | 1.8        |
| Year 3          | 1.7        |
| Year 4          | 1.4        |
| Year 5          | 0.6        |
| Year 6 and over | 0.9        |
| <b>Total</b>    | <b>8.7</b> |

### 13. Provisions and Contingencies

The provisions balance includes the following:

| (in millions of Canadian dollars) | January 1, 2024 | Additional provisions recognized | Provisions utilized | Unused amounts reversed | December 31, 2024 |
|-----------------------------------|-----------------|----------------------------------|---------------------|-------------------------|-------------------|
| Environmental costs               | 2.3             | 5.3                              | (2.7)               | (1.5)                   | 3.4               |
| Litigation and equipment repairs  | 3.6             | 8.8                              | (8.9)               | (0.9)                   | 2.6               |
| <b>Total provisions</b>           | <b>5.9</b>      | <b>14.1</b>                      | <b>(11.6)</b>       | <b>(2.4)</b>            | <b>6.0</b>        |

#### Environmental costs

The Corporation's operations are subject to numerous federal, provincial, and municipal environmental laws and regulations concerning among other things, the management of air emissions, wastewater, hazardous materials, wastes and soil contamination as well as the management and decommissioning of underground and aboveground storage tanks. A risk of environmental liability is inherent in railroad and related transportation operations, real estate ownership and other activities of the Corporation with respect to both current and past operations.

The Corporation has performed a review of all of its operations and of all of its sites and facilities at risk in order to determine the potential environmental risks. The sites and the facilities for which environmental risks were identified were or will be the subject of thorough

studies and corrective actions were or will be taken if necessary in order to eliminate or to mitigate these risks. The continuous risk management process that is in place allows the Corporation to monitor its activities and properties under normal operating conditions as well as monitor accidents that occur. The properties likely to be contaminated or the activities or property, plant and equipment likely to cause contamination are addressed, at the moment of their observation, by the development of an action plan according to the nature and the importance of the impact and the applicable requirements.

When remediation costs can be reasonably estimated, a provision is recorded based on the anticipated future costs.

### 13. Provisions and Contingencies (cont'd)

However, the Corporation's ongoing efforts to identify potential environmental concerns that may be associated with its properties may lead to future environmental investigations, which may result in the identification of additional environmental costs and liabilities. The magnitude of such additional liabilities and the costs of complying with environmental laws and containing or remediating contamination cannot be reasonably estimated due to:

- (i) the lack of specific technical information available with respect to many sites;
- (ii) the absence of any third-party claims with respect to particular sites;
- (iii) the uncertainty regarding the ability to recover costs from any third parties with respect to particular sites;
- (iv) the fact that the environmental responsibility has not been clearly attributed.

#### Litigation and equipment repairs

The Corporation is subject to claims and legal proceedings brought against it in the normal course of business. The timing of the settlement of these claims depends to a large extent on the pace of negotiation with the various counterparties and legal authorities. The Corporation cannot reliably estimate when these claims will be resolved.

Also, the Corporation incurs equipment repair costs as a result of crossing accidents and other incidents causing damages to the rolling stock. These equipment repair claims are mostly settled between 3 and 18 months from the date of initiation.

Such matters are subject to several uncertainties. Management believes that adequate provisions for litigation and equipment repairs have been made in the affected accounts. The ultimate resolution of those matters is not expected to have a significant adverse effect on the Corporation's financial position.

The Corporation is currently involved in a legal action before the Canadian Transportation Agency regarding the terms and conditions of the Train Service Agreement with one of its railway partners. Given the uncertainty and difficulty in quantifying the outcome, the Corporation has opted not to record any provisions in its financial statements. Management however believes that the final outcome of this matter is not expected to have a substantial negative impact on the Corporation's financial position.

#### Asset retirement

The Corporation has entered into certain operating leases where the lessor has the option of requesting that the land/structures or the other assets be returned in the same condition as they were originally leased, or of retaking control of these assets without any compensation to the Corporation for any additions or modifications made to the initial assets. Given the nature of the assets under contract and the options available to the lessor, the asset retirement obligation cannot be reasonably estimated. No liability has been recognized in the financial statements.

## 14. Deferred Revenues and Other Liabilities

Deferred revenues and other liabilities are comprised of the following:

| (in millions of Canadian dollars)                    | 2024        | 2023        |
|--|-------------|-------------|
| Advance ticket sales                                 | 37.6        | 29.2        |
| VIA Préférence loyalty program                       | 10.8        | 9.8         |
| Other  | 8.8         | 7.2         |
| <b>Total deferred revenues and other liabilities</b> | <b>57.2</b> | <b>46.2</b> |

Advance ticket sales, which represent contract liabilities, relate to payments received in advance of performance under the contract. Contract liabilities are recognized as revenue as the Corporation performs the contract.

In the current reporting period, an amount of \$21.2 million of revenue was recognized relating to previous year advance ticket sales (December 31, 2023: \$14.0 million). Management expects that 70 percent of the current advance ticket sales will be recognized as revenue during the next reporting period.

## 15. Other Payables

The balance of other payables includes an amount of \$49.4 million (December 31, 2023: \$35.0 million) related to a project in progress which is not due to the supplier as at December 31, 2024 as well as holdbacks on contracts and other accruals of \$31.7 million (December 31, 2023: \$20.6 million). The Corporation will request the funding from the Government of Canada in the year in which the payable will be paid out. The balance also includes an amount of \$0.3 million (December 31, 2023: \$0.3 million) related to operating expenses that will be paid in the future years.

## 16. Employee Benefit Assets and Liabilities

The Corporation provides a number of pension plans with defined benefits (funded) and defined contribution components. The Corporation also provides other employee benefits that are unfunded, which comprise post-retirement medical and life insurance benefits, and long-term employee benefits such as self-insured workers' compensation benefits, long-term employee disability benefits and continuation of benefit coverage for employees on long-term disability.

### Pension plans

The Corporation's pension plans are governed according to applicable federal legislation such as the *Pension Benefits Standards Act and the Income Tax Act*. The pension plans are under the jurisdiction of the Office of the Superintendent of Financial Institutions Canada.

### Employees entitled to a defined benefit pension

Pension benefits are based on years of service and average salary of the employee's best five consecutive calendar years up to retirement.

Participants contribute a fixed percentage of their earnings to the pension plan while the Corporation contributes the amount needed to maintain adequate funding as dictated by the prevailing regulation. The pension plans may be required to take measures to offset any funding and solvency deficit by changing the Corporation's and participants' contribution rate. Moreover, additional contributions by the Corporation may be required if these rules are not complied with. The Board is responsible for the investment policy with regard to the assets of the fund.

### Employees entitled to a hybrid pension plan

Employees are provided pension benefits in part from a reduced formula of the defined benefit component of the pension plan, and in part from a defined contribution component.

#### i) Defined benefit component

Pension benefits under the reduced formula are based on years of service and average salary of the employee's best five consecutive calendar years up to retirement. On each April 1, following the third anniversary of the retirement date, the participant's pension benefits will be indexed by 50 percent of the increase in the Consumer Price Index subject to a maximum increase of 3 percent, but only if the plan is in a surplus situation.

The contributions required to fund the defined benefit component of the plan are entirely paid for by the Corporation. The Corporation's contributions vary according to the financial situation of the plan, as determined by the plan's actuary and in accordance with regulatory requirements for pension plan funding.

The Board is responsible for the investment policy with regard to the assets of the fund.

## 16. Employee Benefit Assets and Liabilities (cont'd)

### ii) Defined contribution component

Participants' and corporation's contributions to the defined contribution component are mandatory and represent 4 percent of their salary. Optional contributions to the defined contribution component can be made by the participants to a maximum of 3 percent of their salary. The Corporation's contribution is equal to 50 percent of participants' optional contributions.

The retirement income is based on the accumulation of funds in the individual retirement savings account of the defined contribution component of the plan.

Participants have control over the investment decisions and bear the investment risk.

### Employees entitled to a defined contribution pension

Participants' and corporation's contributions to the defined contribution plan are mandatory and represent 4 percent of their salary. Optional contributions to the defined contribution component can be made by the participants to a maximum of 3 percent of their salary. The Corporation's contribution is equal to 100 percent of participants' contributions.

The retirement income is based on the accumulation of funds in the individual's retirement savings account of the defined contribution component of the plan.

Participants have control over the investment decisions and bear the investment risk.

The expense for the defined contribution component of the pension plan for the year ended December 31, 2024 is \$4.3 million (December 31, 2023: \$3.7 million). The employer contributions are expected to be \$4.5 million in 2025.

### Actuarial valuations

The actuarial valuations for these employee benefits, except for the defined contribution component of the pension plans, are carried out by external actuaries who are members of the Canadian Institute of Actuaries.

## 16. Employee Benefit Assets and Liabilities (cont'd)

The actuarial valuations of the various employee benefit plans are as follows:

| Employee benefit plans:  | ACTUARIAL VALUATION   |                   |
|--|-----------------------|-------------------|
|  | Most recent valuation | Next valuation    |
| Pension plans  | December 31, 2023     | December 31, 2024 |
| Supplemental Executive Retirement Plan   | December 31, 2024     | December 31, 2025 |
| Supplemental Retirement Plan for management employees (SRP), with respect to active members  | December 31, 2023     | December 31, 2024 |
| Supplemental Retirement Plan for management employees (SRP), with respect to retired members | December 31, 2024     | December 31, 2025 |
| Post-employment unfunded plan  | May 1, 2022           | May 1, 2025       |
| Self-insured Workers' Compensation   | December 31, 2021     | December 31, 2024 |
| Long-term employee benefits plans, other than "Self-insured Workers' Compensation"           | December 31, 2022     | December 31, 2024 |

## 16. Employee Benefit Assets and Liabilities (cont'd)

### Defined benefit component of the pension plans and other employee benefit plans

Based on these actuarial valuations and projections to December 31, the summary of the principal valuation results, in aggregate, is as follows:

| (in millions of Canadian dollars)  | DEFINED BENEFIT COMPONENT<br>OF THE PENSION PLANS |                | OTHER EMPLOYEE BENEFIT PLANS* |               |
|--|---|----------------|-------------------------------|---------------|
|  | 2024  | 2023           | 2024                          | 2023          |
| <b>FAIR VALUE OF PLAN ASSETS</b>   |   |                |                               |               |
| Balance, beginning of year   | 2,402.4   | 2,334.2        | -                             | -             |
| Interest income  | 108.0   | 116.3          | -                             | -             |
| Return on plan assets (excluding interest income)  | 128.4   | 68.8           | -                             | -             |
| Employer contributions (Note 1)  | -   | -              | 5.7                           | 5.0           |
| Defined benefit surplus utilized for defined contribution plan employer contributions (Note 2) | (3.0)   | (2.2)          | -                             | -             |
| Employee contributions   | 12.5  | 12.8           | -                             | -             |
| Benefits paid  | (127.2)   | (125.4)        | (5.7)                         | (5.0)         |
| Administration expenses  | (2.2)   | (2.1)          | -                             | -             |
| <b>Balance, end of year</b>  | <b>2,518.9</b>                                    | <b>2,402.4</b> | <b>-</b>                      | <b>-</b>      |
| <b>DEFINED BENEFIT OBLIGATION</b>  |   |                |                               |               |
| Balance, beginning of year   | 2,065.5   | 1,950.7        | 32.6                          | 31.2          |
| Service cost   | 21.6  | 18.3           | 2.8                           | 3.7           |
| Past service cost  | 0.1   | 0.1            | 0.1                           | 0.3           |
| Interest expense   | 94.0  | 97.7           | 1.5                           | 1.6           |
| Employee contributions   | 12.5  | 12.8           | -                             | -             |
| Benefits paid  | (127.2)   | (125.4)        | (5.7)                         | (5.0)         |
| Effect of change in demographic assumptions  | -   | (4.1)          | -                             | (0.2)         |
| Effect of change in financial assumptions  | (23.2)  | 114.1          | (0.2)                         | 1.6           |
| Effect of experience adjustments   | 7.2   | 1.3            | 1.0                           | (0.6)         |
| <b>Balance, end of year</b>  | <b>2,050.5</b>                                    | <b>2,065.5</b> | <b>32.1</b>                   | <b>32.6</b>   |
| <b>Net employee benefit asset (liability)</b>  | <b>468.4</b>                                      | <b>336.9</b>   | <b>(32.1)</b>                 | <b>(32.6)</b> |

Note 1: In 2022, the Corporation's Defined Benefit Pension Plan (DBP) had a going concern excess, and solvency assets exceeding 105% of liabilities, therefore no minimum contributions were required to be made during the 2023 and 2024 fiscal years.

Note 2: In accordance with the VIA Rail Pension Plan regulations, a withdrawal of \$3.0 million (December 31, 2023: \$2.2 million) from the Non-Unionized defined benefit pension surplus was utilized to fund the Non-Unionized Defined Contribution Plan (DCP) employer contributions during the 2024 fiscal year.

\*Certain comparative figures have been reclassified to conform with the current year's presentation (Note 24).

## 16. Employee Benefit Assets and Liabilities (cont'd)

### Expected employer contribution for the next year:

| (in millions of Canadian dollars)                       | Defined benefit component of the pension plans | Other employee benefit plans |
|---|--|------------------------------|
|   | 2025   | 2025                         |
| <b>Expected employer contribution for the next year</b> | –  | 4.7                          |

The weighted average duration of the defined benefit obligation of the pension plans is 11.8 years (December 31, 2023: 11.9 years).

The fair value of the defined benefit component of the pension plan assets by major categories are as follows:

| (in millions of Canadian dollars) | 2024                                |   |   |                | 2023*                               |   |   |         |
|-----------------------------------|-------------------------------------|---|---|----------------|-------------------------------------|---|---|---------|
|                                   | Level 1<br>(quoted<br>market price) | Level 2<br>(not quoted<br>market price) | Level 3<br>(not quoted<br>market price) | Total          | Level 1<br>(quoted<br>market price) | Level 2<br>(not quoted<br>market price) | Level 3<br>(not quoted<br>market price) | Total   |
| <b>Assets categories</b>          |                                     |   |   |                |                                     |   |   |         |
| Cash and short-term notes         | 54.8                                | 0.5                                     | –                                       | <b>55.3</b>    | 66.7                                | 1.5                                     | –                                       | 68.2    |
| Equity securities                 | 433.1                               | –                                       | 0.6                                     | <b>433.7</b>   | 395.5                               | –                                       | –                                       | 395.5   |
| Fixed income securities           | –                                   | 594.4                                   | 16.2                                    | <b>610.6</b>   | –                                   | 535.0                                   | 17.6                                    | 552.6   |

## 16. Employee Benefit Assets and Liabilities (cont'd)

### Asset-liability matching strategies

The Corporation reassesses the pension plans investment policy annually to take into account material changes in plan demographics, the investment environment, and the financial circumstances of the plans as well as changes in risk tolerance. Every few years or when significant changes in circumstances warrant it, the Corporation will conduct a more complete asset liability modelling exercise to determine an optimal investment policy asset mix.

The current asset mix, with its sizable allocation to fixed income securities and income-based alternative investments, provides a significant amount of interest rate hedging compared to plan liabilities. This policy posture is expected to deliver a lower volatility of required funding while preserving ongoing funding costs at an acceptable level when considering the plan maturity profile.

### Risk associated with defined benefit plans

The major risk associated with the pension plans is the funding risk, which is the risk that the investment asset growth and the contributions to the pension plans will not be sufficient to cover the pension obligations, resulting in unfunded liabilities.

Since the present value of the liability is calculated based on the discount rate based on high-quality Canadian corporate bond yields, the plans are also exposed to investment risk and to interest rate risk. Since the defined benefit obligation is adjusted according to the consumer price index, the plans are exposed to inflation risk, interest rate risk and longevity risk. Because plan assets include significant amounts in equity investments, the plans are exposed to equity market risk. The present value of the defined benefit plan liability is calculated by reference to the future salaries of participants, which expose the plan to salary risk.

## 16. Employee Benefit Assets and Liabilities (cont'd)

### Sensitivity analysis

The Corporation has reviewed the assumptions used in the actuarial calculations and has identified the following assumptions as those that could result in a significant impact on the defined benefit obligation:

| (in millions of Canadian dollars)                      | OBLIGATION INCREASE / (DECREASE) |        |
|--|----------------------------------|--------|
|  | 2024                             | 2023   |
| <b>Defined benefit component of the pension plans:</b> |                                  |        |
| <b>Inflation rates</b>                                 |                                  |        |
| Increase of 25 basis points                            | 28.0                             | 28.7   |
| Decrease of 25 basis points                            | (27.6)                           | (28.3) |
| <b>Discount rates</b>                                  |                                  |        |
| Increase of 25 basis points                            | (56.2)                           | (57.4) |
| Decrease of 25 basis points                            | 59.1                             | 60.3   |
| <b>Pensions-in-payment</b>                             |                                  |        |
| Increase of 25 basis points                            | 25.5                             | 26.2   |
| Decrease of 25 basis points                            | (25.0)                           | (25.7) |
| <b>Salary increase rates</b>                           |                                  |        |
| Increase of 25 basis points                            | 3.5                              | 3.5    |
| Decrease of 25 basis points                            | (3.5)                            | (3.5)  |
| <b>Mortality tables</b>                                |                                  |        |
| 1 year younger   | 52.1                             | 52.3   |

| Increase of 25 basis points                            | (0.9)                            | (0.9)  |
| Decrease of 25 basis points                            | 0.9                              | 0.9    |

\*Certain comparative figures have been reclassified to conform to the current year's presentation (Note 24).

## 16. Employee Benefit Assets and Liabilities (cont'd)

In the sensitivity analysis presented above, the present value of the defined benefit obligation has been calculated using the projected unit credit method at the end of the reporting period, which is the same method as the one applied in calculating the defined benefit obligation recognized in the Statement of Financial Position.

There was no change in the method and assumptions used in preparing the sensitivity analysis from prior years.

### Total amounts recognized in the Statement of Comprehensive Income:

| (in millions of Canadian dollars)              | 2024        | 2023       |
|--|-------------|------------|
| <b>Operating expenses:</b>                     |             |            |
| Defined benefit component of the pension plans | 9.9         | 1.9        |
| Other employee benefit plans*                  | 5.8         | 5.6        |
| <b>Total</b>                                   | <b>15.7</b> | <b>7.5</b> |

\*Certain comparative figures have been reclassified to conform to the current year's presentation (Note 24).

These operating expenses are included in the "Compensation and employee benefits" line item of the Statement of Comprehensive Income.

| (in millions of Canadian dollars)              | 2024         | 2023          |
|--|--------------|---------------|
| <b>Other comprehensive income (loss):</b>      |              |               |
| Defined benefit component of the pension plans | 144.4        | (42.5)        |
| Other employee benefit plans                   | 0.6          | (0.8)         |
| <b>Total</b>                                   | <b>145.0</b> | <b>(43.3)</b> |

## 17. Income Taxes

The income tax expense consists of the following:

| (in millions of Canadian dollars) | 2024       | 2023       |
|-----------------------------------|------------|------------|
| Deferred                          | 4.7        | 1.3        |
| <b>Income tax recovery</b>        | <b>4.7</b> | <b>1.3</b> |

The overall income tax expense for the year differs from the amount that would be computed by applying the combined federal and provincial statutory income tax rates of 26.53 percent (December 31, 2023: 26.53 percent) to income before taxes. The reasons for the differences are as follows:

| (in millions of Canadian dollars)                   | 2024         | 2023          |
|---|--------------|---------------|
| <b>Net loss before income taxes</b>                 | <b>(4.7)</b> | <b>(10.4)</b> |
| Computed income tax recovery – statutory rates      | 1.2          | 2.7           |
| Non-deductible accounting expenses and other        | (0.1)        | (0.3)         |
| Effect of unrecognized tax attributes               | 3.3          | (1.2)         |
| Effect of tax rate changes on deferred income taxes | 0.3          | 0.1           |
| <b>Income tax recovery</b>                          | <b>4.7</b>   | <b>1.3</b>    |

Deferred income tax reflects the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes.

## 17. Income Taxes (cont'd)

Significant components of the deferred income tax assets and liabilities are as follows:

### Deferred income tax balances December 31, 2024

| (in millions of Canadian dollars)            | Opening<br>Balance | Recognized in<br>net income | Recognized in OCI | Closing<br>Balance |
|--|--------------------|-----------------------------|-------------------|--------------------|
| Property, plant and equipment                | 26.5               | 4.7                         | –                 | 31.2               |
| Intangible assets                            | (0.2)              | (1.5)                       | –                 | (1.7)              |
| Provisions                                   | 2.1                | (0.4)                       | –                 | 1.7                |
| Lease liabilities                            | 26.8               | (0.4)                       | –                 | 26.4               |
| Employee benefit liabilities                 | 8.7                | 0.1                         | (0.2)             | 8.6                |
| Losses carry-forward                         | 14.5               | (1.4)                       | –                 | 13.1               |
| <b>Total deferred income tax assets</b>      | <b>78.4</b>        | <b>1.1</b>                  | <b>(0.2)</b>      | <b>79.3</b>        |
| Other assets                                 | –                  | (0.2)                       | –                 | (0.2)              |
| Right-of-use assets                          | (24.2)             | 0.4                         | –                 | (23.8)             |
| Employee benefit assets                      | (89.4)             | 3.4                         | (38.3)            | (124.3)            |
| <b>Total deferred income tax liabilities</b> | <b>(113.6)</b>     | <b>3.6</b>                  | <b>(38.3)</b>     | <b>(148.3)</b>     |
| <b>Deferred income tax liabilities</b>       | <b>(35.2)</b>      | <b>4.7</b>                  | <b>(38.5)</b>     | <b>(69.0)</b>      |

## 17. Income Taxes (cont'd)

Significant components of the deferred income tax assets and liabilities are as follows:

### Deferred income tax balances December 31, 2023

| (in millions of Canadian dollars)            | Opening<br>Balance | Recognized in<br>net income | Recognized in OCI | Closing<br>Balance |
|--|--------------------|-----------------------------|-------------------|--------------------|
| Property, plant and equipment                | 26.2               | 0.3                         | –                 | 26.5               |
| Intangible assets                            | 1.0                | (1.2)                       | –                 | (0.2)              |
| Provisions                                   | 1.3                | 0.8                         | –                 | 2.1                |

| <b>Deferred income tax liabilities</b>       | <b>(48.0)</b>      | <b>1.3</b>                  | <b>11.5</b>       | <b>(35.2)</b>      |

## 17. Income Taxes (cont'd)

The Corporation has \$49.2 million (December 31, 2023: \$54.6 million) of unused federal and other provinces and \$51.7 million (December 31, 2023: \$57.1 million) of unused Québec non-capital tax losses carried forward. These losses expire between 2031 and 2042.

The Corporation has not recognized any deferred tax assets on certain of its deductible temporary differences as it has determined that it is not probable that taxable profit will be available against which the deductible temporary differences can be utilized. The Ontario corporate minimum tax credit and losses expire between 2030 and 2044.

Unrecognized deductible temporary differences for which no deferred tax assets have been recognized are attributed to the following:

| (in millions of Canadian dollars)                   | 2024         | 2023         |
|---|--------------|--------------|
| <b>Federal and other provinces:</b>                 |              |              |
| Ontario corporate minimum tax credit and losses     | 102.4        | 97.7         |
| <b>Total</b>  | <b>102.4</b> | <b>97.7</b>  |
| <b>Québec:</b>                                      |              |              |
| Property, plant and equipment and intangible assets | 106.5        | 247.3        |
| <b>Total</b>  | <b>106.5</b> | <b>247.3</b> |

## 18. Deferred Capital Funding

Deferred capital funding represents the unamortized portion of the funding used to purchase property, plant and equipment and intangible assets.

| (in millions of Canadian dollars)  | 2024           | 2023    |
|--|----------------|---------|
| <b>Balance, beginning of year</b>  | <b>2,137.4</b> | 1,867.1 |
| Government funding for property, plant and equipment and intangible assets (including the cost of land)      | 524.1          | 391.2   |
| Government funding for an advance on contract  | 3.0            | -       |
| Transfer from capital funding to operating funding   | -              | (0.9)   |
| <b>Total Government funding for property, plant and equipment, intangible assets and advance on contract</b> | <b>527.1</b>   | 390.3   |
| Amortization of deferred capital funding   | (146.3)        | (120.0) |
| <b>Balance, end of year</b>  | <b>2,518.2</b> | 2,137.4 |

## 19. Share Capital

The authorized share capital of the Corporation is comprised of an unlimited number of common shares with no par value. For all years presented, 93,000 shares at \$100 per share are issued and fully paid.

The Corporation defines its capital as share capital and accumulated deficit and is regulated by the *Financial Administration Act*. The Corporation is not allowed to modify its capital structure without Government approval. The Corporation must obtain Government approval to issue debt instruments. Accordingly, the Corporation does not have access to external financing and does not have a flexible capital structure.

The Corporation manages its equity by prudently managing revenues, expenses, assets, liabilities, investments and general financial dealings to ensure that the Corporation effectively achieves its objectives and purpose while remaining a going concern. The Corporation did not change the way it manages its equity in the current year.

## 20. Supplemental Cash Flows Information

### Net change in working capital items:

| (in millions of Canadian dollars)       | 2024          | 2023        |
|---|---------------|-------------|
| Trade and other receivables             | (36.8)        | 4.3         |
| Other assets                            | (1.5)         | 0.6         |
| Materials                               | (0.8)         | (2.9)       |
| Trade and other payables                | (1.8)         | 0.6         |
| Provisions                              | 0.1           | 1.9         |
| Deferred revenues and other liabilities | 12.5          | 6.8         |
| <b>Total</b>                            | <b>(28.3)</b> | <b>11.3</b> |

The change in trade and other receivables excludes an amount of \$83.6 million (December 31, 2023: (\$38.9) million) in relation to government funding for capital expenditures, as the amount relates to investing activities.

## 20. Supplemental Cash Flows Information (cont'd)

### Investing activities supplemental information:

| (in millions of Canadian dollars)  | 2024           | 2023           |
|--|----------------|----------------|
| Acquisition of property, plant and equipment and intangible assets   | (586.4)        | (404.1)        |
| Acquisition of property, plant and equipment financed by the Asset Renewal Funds   | (0.1)          | –              |
| <b>Total acquisition of property, plant and equipment and intangible assets</b>  | <b>(586.5)</b> | <b>(404.1)</b> |
| Additions to property, plant and equipment and intangible assets not affecting cash as they were previously cashed out through the advances on contracts | 19.3           | 8.4            |
| Change in accounts payable and accruals – Capital assets*  | (6.2)          | 25.4           |
| Change in non-current other payables*  | 25.8           | 26.6           |
| <b>Total cash out for acquisition of property, plant and equipment and intangible assets</b>   | <b>(547.6)</b> | <b>(343.7)</b> |
| Government funding invoiced for property, plant and equipment and intangible assets  | 524.1          | 391.2          |
| Change in amount receivable from the Government of Canada – Capital funding  | 83.6           | (38.9)         |
| <b>Total Government funding received for property, plant and equipment and intangible assets</b>   | <b>607.7</b>   | <b>352.3</b>   |

\*Certain comparative figures have been reclassified to conform to the current year's presentation (Note 24).

## 21. Financial Risks

### a) Risk management

As part of its operations, the Corporation enters into transactions with financial risks exposure such as credit, liquidity and market risks. Exposure to such risks is significantly reduced through close monitoring and strategies that include the use of derivative financial instruments.

Derivative financial instruments such as swaps are utilized by the Corporation in the management of its exposure to changes in fuel prices. Commodity swaps are used to manage its exposure to fuel prices on the entirety of its fuel consumption. There have been no significant transfers between levels 1 and 2 during the current and prior year. There has been no change in the valuation techniques from the prior year.

The Corporation does not enter into derivative financial instruments for trading or speculative purposes. The Corporation does not currently apply hedge accounting on these derivative financial instruments.

### b) Foreign exchange risk

The Corporation is exposed to foreign exchange risks on the following balances that are denominated in U.S. dollars (USD):

| (in millions of Canadian dollars) | 2024 | 2023 |
|-----------------------------------|------|------|
| <b>Assets:</b>                    |      |      |
| Cash                              | 1.3  | 0.6  |
| Trade and other receivables       | 1.3  | 0.8  |
| <b>Liabilities:</b>               |      |      |
| Trade and other payables          | 3.8  | 2.3  |

A variance of 5 percent in the exchange rate of USD would not have a significant impact on the Corporation's net income.

## 21. Financial Risks (cont'd)

### c) Credit risk

Credit risk is the risk that one party to a financial instrument might not meet its obligations under the terms and conditions of the agreement. The carrying amount of financial assets is \$79.2 million (December 31, 2023: \$41.2 million) and represents the Corporation's maximum exposure to credit risk. The Corporation does not use credit derivatives or similar instruments to mitigate this risk and, as such, the maximum exposure is the full carrying value or face value of its financial assets. The Corporation minimizes credit risk on cash, the Asset Renewal Fund and derivative financial instruments by dealing only with reputable and high-quality financial institutions. The Corporation's exposure to credit risks on trade accounts receivable is reduced by applying a credit policy that establishes limits on the concentration of risk, requires assessing and monitoring of counterparty credit risk and sets credit limits. Only Canadian Government departments and agencies, Crown corporations issuing government travel warrants and travel agents who are members of the International Air Transport Association (Billing and Settlement Plan / Airline Reporting Corporation) are exempt from the Corporation's credit approval process.

As at December 31, 2024, approximately 8.5 percent (December 31, 2023: 4.9 percent) of trade accounts receivable were over 90 days past due, while approximately 69.5 percent (December 31, 2023: 79.2 percent) of trade accounts receivable were current (under 30 days).

As at December 31, 2024, the loss allowance was \$0.9 million (December 31, 2023: \$0.3 million).

### d) Fuel price risk

In order to manage its exposure to changes in fuel prices and minimize volatility in operating cash flows, the Corporation enters into derivative contracts with financial intermediaries based on the price of a commodity (i.e. heating oil) or a market index. A fluctuation of 5 percent in the USD price of heating oil or fuel would not have a significant impact on the financial statements.

### e) Liquidity risk

The Corporation manages its liquidity risk by preparing and monitoring detailed forecasts of cash flows from operations and anticipated investing and funding activities. The liquidity risk is low since the Corporation does not have debt instruments to service and receives regular funding from the Government of Canada.

The reported financial liabilities below totaling \$326.7 million (December 31, 2023: \$310.8 million) represent the maximum liquidity risk exposure for the Corporation.

## 21. Financial Risks (cont'd)

The following table summarizes the contractual maturities for the derivative and non-derivative financial liabilities, on a gross and undiscounted basis, as at December 31, 2024:

| (in millions of Canadian dollars)       | Less than 1 year | 1 to 2 years | Over 2 years | Total        |
|---|------------------|--------------|--------------|--------------|
| Trade and other payables                | 245.1            | –            | –            | 245.1        |
| Deferred revenues and other liabilities | 0.2              | –            | –            | 0.2          |
| Non-current other payables              | –                | 56.2         | 25.2         | 81.4         |
| <b>Total</b>                            | <b>245.3</b>     | <b>56.2</b>  | <b>25.2</b>  | <b>326.7</b> |

The following table summarizes the contractual maturities for the derivative and non-derivative financial liabilities, on a gross and undiscounted basis, as at December 31, 2023\*:

| (in millions of Canadian dollars)       | Less than 1 year | 1 to 2 years | Over 2 years | Total        |
|---|------------------|--------------|--------------|--------------|
| Trade and other payables                | 253.3            | –            | –            | 253.3        |
| Deferred revenues and other liabilities | 1.6              | –            | –            | 1.6          |
| Non-current other payables              | –                | 46.9         | 9.0          | 55.9         |
| <b>Total</b>                            | <b>254.9</b>     | <b>46.9</b>  | <b>9.0</b>   | <b>310.8</b> |

*\*During the current year, the Corporation revised the time bands used to provide the contractual maturities for the derivative and non-derivative financial liabilities and disclosed less time bands to better meet the needs of the financial statements' users. As a result, certain comparative figures have been reclassified to conform to the current year's presentation (Note 24).*

### f) Interest rate risk

Interest rate risk is defined as the Corporation's exposure to a loss of earnings or a loss in the value of its financial instruments as a result of fluctuations in interest rates. As at December 31, 2024 and December 31, 2023, there was no exposure to interest rate risk as all the Corporation's liquidity were invested in cash accounts.

## 22. Commitments

The following table presents the contractual commitments of the Corporation that are not included in the Statement of Financial Position:

| (in millions of Canadian dollars)                        | 2024              |                  |                   |                   |
|--|-------------------|------------------|-------------------|-------------------|
|  | Total commitments | Less than 1 year | From 1 to 5 years | More than 5 years |
| <b>COMMITMENTS RELATING TO OPERATIONS</b>                |                   |                  |                   |                   |

| <b>Total commitments</b>                                 | <b>887.7</b>      | <b>232.0</b>     | <b>231.0</b>      | <b>424.7</b>      |

## 22. Commitments (cont'd)

a) As mentioned in Note 1 Authority, Objectives and General Information, the Corporation has entered into train service agreements for the use of tracks and the control of train operations. For some contracts, no amounts are included in the table above regarding those contracts since the amount of the commitments depends on the annual usage of the tracks. In the normal course of business, the Corporation enters into contractual agreements to acquire goods and services over periods extending beyond one year. The Corporation presents non-cancellable contractual obligations, which are financial obligations to third parties that will become liabilities when the terms of these contracts or agreements to acquire goods or services are met.

b) The Corporation has provided letters of credit through a financial institution totalling approximately \$23.8 million (December 31, 2023: \$25.3 million) to various provincial government workers' compensation boards as security for future payment streams.

## 23. Related Party Transactions

### A) Government of Canada, its agencies and other Crown corporations

The Corporation is related in terms of common ownership to all Government of Canada created departments, agencies and Crown corporations. The Corporation enters into transactions with these entities in the normal course of business on trade terms similar to those applied to other individuals and enterprises and these transactions are recorded at fair value.

In 2022, the Corporation and the unconsolidated structured entity entered into a service agreement for collaboration and support regarding the High Frequency Rail (HFR) project and for back-office services provided by the Corporation to VIA HFR – TGF VIA Inc. to facilitate the organization and functioning of the unconsolidated structured entity. As at December 31, 2024, the Corporation has an account receivable from VIA HFR – TGF VIA Inc. of \$0.4 million (December 31, 2023: \$1.2 million) and re-invoiced a total amount of \$3.8 million (December 31, 2023: \$1.7 million) during the year mainly included in the "Professional services" and "Compensation and employee benefits" lines item of the Statement of Comprehensive Income. There were no significant transactions in 2024 and 2023.

Other than disclosed elsewhere in these financial statements, related party transactions are not significant.

## 23. Related Party Transactions (cont'd)

### B) Key management personnel

The remuneration of key executives with the exception of the President and Chief Executive Officer is determined by the Human Resources Committee having regard to the performance of individuals and market trends. The Human Resources Committee recommendation is then presented and approved by the Board of Directors. The remuneration of the President and Chief Executive Officer is determined by the Governor in Council.

The Corporation's key executives have been defined as the executive staff members that are members of the Corporate Management Committee and the members of the Board of Directors.

The compensation of the key executives of the Corporation is as follows:

| (in millions of Canadian dollars)             | 2024       | 2023       |
|---|------------|------------|
| Compensation and short-term employee benefits | 4.3        | 4.0        |
| Termination benefits                          | 1.3        | 0.8        |
| Other employee benefits                       | 1.0        | 1.0        |
| <b>Total</b>                                  | <b>6.6</b> | <b>5.8</b> |

The Corporation may enter into transactions with corporations who employ close family members of key management personnel or Directors of the Board. These transactions are made in the normal course of business and are recorded at fair value. These transactions are not significant for the years ended December 31, 2024 and December 31, 2023.

### C) Transactions with post-employment benefits plans

Transactions with the Corporation's post-employment benefits plans are conducted in the normal course of business. The transactions with the Corporation's post-employment benefit plans consist of contributions as determined by actuarial valuations, as disclosed in Note 16. There were no other significant transactions during the year.

## 24. Comparative Figures

During the year, the Corporation changed the classification of certain accrued amounts on the Statement of Financial Position from current liabilities to non-current liabilities to better reflect the current obligations of the Corporation, and as a result, the comparative figures have also been reclassified by an amount of \$20.6 million to conform to the current year's presentation. The sub-totals for current liabilities and non-current liabilities were impacted by the same amount of \$20.6 million. These changes had consequential impacts on the information provided in Note 11 Trade and Other Payables, Note 20 Supplemental Cash Flows Information and Note 21 Financial Risks e) Liquidity Risk.

In addition, the Corporation continued its efforts to provide a clearer and simplified information to the financial statements' users by aggregating a few line items into the current year's Statement of Comprehensive Income, Statement of Cash Flows and by presenting the information disclosed in Note 16 Employee Benefit Assets and Liabilities related to other post-employment benefits and other long-term benefits into one column "Other employee benefit plans". As a result, the comparative figures have been reclassified to conform to the current year's presentation.
